ISTANBUL GELİŞİM UNIVERSITY IS 16TH IN THE WORLD AND 1ST IN TURKEY IN THE FIELD OF "QUALITY EDUCATION"!

Times Higher Education (THE) Impact Ranking 2022, the ranking institution of world universities, has been announced. Among the 1180 universities in the world, Istanbul Gelişim University (IGU) increased its success ranking, which was 24 last year, to 16th place in the category of "Quality Education" by increasing 8 steps this year. It continued to maintain its success last year, ranking 1st among Turkish universities.

The success of Istanbul Gelişim University (IGU) was ranked in five different categories in line with the United Nations Sustainable Development Goals, in the list of 1406 universities, which are listed in the 2022 ranking of the UK-based, world's leading higher education rating agency Times Higher Education (THE).

In the Impact Ranking 2022 list, Istanbul Gelişim University (IGU) increased its degree from 24th to 16th among 1180 world universities in the "Quality Education" category, while maintaining its 1st place among Turkish universities.

Prof. Dr. Rifat MUTUŞ

DO NOT DO IT TO YOUR PETS!

The craziness pertaining to the dying the hair of dogs and cats turned out to be a trend worldwide in recent years. Prof. Dr. Rifat MUTUŞ, who made an explanation about the matter, indicated that the use of dye products on animals may cause serious health problems, even further the death as well.

Dyes Have Toxic Effect

Natural Smell of Animals is not to be Suppressed

The pets with their hair dyed by their owners, who want to distract attention, are frequently seen at streets. This treatment, made entirely towards the discretionary and visual anxieties of people with the effects of social media sharings, has serious negative effects on the animals. The use of these products on the animals may be causing the occurrence of serious health problems such as allergy, poisoning and changes in behaviours and even the deaths of them as well.

Prof. Dr. Rifat MUTUŞ, who is the Dean of the Faculty of Health Sciences and indicated that the dye products, produced for people, have negative consequences for the animals, further said that “The contact of these products with the animal skin may cause various types of skin problems such as irritation, itching, burning and so on. Nevertheless, it may cause digestive system problems where the symptoms such as vomiting, diarrhoea and so on, as a result of toxic effects of the dyes following the licking by dogs and cats of their hair.” and also indicated that the sense of smell of animals are developed very well and distinguish even the smells at low-density.”

It is necessary to abstain from the behaviours that will spoil the natural structure of animals through the use of aesthetical materials, designed for the people, over the pets. Mr. MUTUŞ, who indicated that the materials so used may affect the behaviours of the animals by creating toxic effect on them, further said: “The sense of smell takes up a role at the first degree in animals at structuring the emotional behaviours. As a consequence, the use of dyes having a certain aroma that will suppress the natural smells of animals may cause abnormal changes in the behaviours of animals.”

OBESITY IS SEEN IN 40 % OF PATIENTS SUFFERING FROM ASTHMA

The asthma disease that has been a serious public health problem affecting an approximate number of 370 millions of people throughout the world is seen on one among every 13 persons in our country. Dr. Nurten Elkin, who is a Public Health Specialist from the Istanbul Gelisim University and drew attention to the fact that there was not any drug therapy available in any part of the world totally eliminating the asthma, emphasized the false facts in asthma on the occasion of May 5 International Asthma Day.

The asthma, which affects the people from every age, however, can be taken under control only through correct methods of treatments, is not a disease of childhood as thought and may be developed at later stages as well. Mrs. Elkin, who made evaluations with relation to the disease, experienced relevant increase in the number of cases every year, emphasized that there might be a fall in the daily life qualities of the patients suffering from the asthma.

‘NO DRUG TREATMENT TOTALLY ELIMINATING THE ASTHMA IS AVAILABLE ANYWHERE IN THE WORLD’

The asthma, known as a chronic lung disease, is not a contagious infection, however, allergens, occupational factors, use of tobacco products, domestic and external air pollution, infections, upper respiratory tract infection (flu, sinusitis, nose polyp and so on), psychological factors, drugs, foods and so on, may cause the asthma.

Dr. Nurten Elkin, who is a Public Health Specialist from the Faculty of Health Sciences of the Istanbul Gelisim University and said that no drug treatment totally eliminating the asthma was available anywhere in the world, continued to indicate as follows:

“The disease shows itself with symptoms such as recurrent difficulty in breathing, wheezing/rattle/whistling occurring while breathing, chest tightness, cough and so on. The objective of the asthma treatment is to take the complaints of disease under control and cause the life of the patient to be maintained in a way as close as to the normal life. The symptoms of the asthma could be taken under control with administering convenient drug treatment. It is crucially important to abstain from the factors causing the occurrence of the disease and use of drugs in a proper and regular manner.”

The asthma is seen in one among every 12-13 adults and one of every 7-8 children in our country

OBESITY IS SEEN AMONG 40 PER CENT OF THE PEOPLE SUFFERING FROM THE ASTHMA

The researches so made show that the use of drugs by the patients as instructed by their physician, giving up smoking and loss of weight by the obese patients, nourishment in a balance and sound way, exercising regularly, keeping the ambient air breathed clean facilitate the control of the asthma. It is reported that 30-40 % of the patients suffering from the asthma also suffer from the asthma as well, and loss of weight could improve the control of the illness. Mrs. Elkin indicated that the loss of weight among the asthmatic patients, who also suffer from the obesity, under the observation of physicians and dieticians would affect the course of the disease in an affirmative way, and it is also understood from the researches that giving up smoking and loss of weight among the patients suffering from obesity have facilitated the control of the asthma.

IF YOU SUFFER FROM THE ASTHMA, KEEP AWAY FROM THE FOLLOWING!

The Academic Member Dr. Nurten Elkin, who indicated that there are many false facts available among the public, listed up especially those that the patients suffering from the asthma have to pay attention thereto. In this respect it is necessary:

1. To increase ventilation in residents and workplaces.
2. To protect from domestic dusts and mites, and wear mask while doing domestic work.
3. To wear mask while getting in touch with the pets.
4. Not to disregard wearing sun glasses and masks in order to protect from pollen during the mid-seasons.
5. To prevent the contact of the patient with tobacco smoke.
6. To abstain from the gases arising from paints and polishes, stoves, oven fuel, fried oil and so on, and the rooms related thereto have to be ventilated properly in case of these kinds of circumstances.
7. That it is possible to make exercises and even further, heavy sports if the disease is under control in the patients suffering from the asthma.
8. That the opinion having indicated that the asthma drugs cause addiction is entirely untrue, and none of the medicines, used in the treatment, has any effect creating addiction. When the medicines abandoned, the patient will never suffer from the lack of such medicine(s).
9. Not to use the substances having irritation effects such as bleaches, hydrochloric acid and so on, among the cleansing materials at domestic places.

The Academic Member Dr. Nurten Elkin, who indicated that it was possible to put the asthma under control through the related treatment, further emphasized that taking necessary protective measures and raising the conformance of the patient to the treatment might create important developments in the course of the disease in the event that the triggering and risk factors were abstained therefrom.

CREATIVE DRAMA WORKSHOP

“Creative Drama Workshop” organized by Istanbul Gelisim University Faculty of Health Sciences Child Development and Health Awareness Club was held with the participation of students from the Turkish and English Departments of Child Development.

Asst. Prof. Filiz Arzu YALIN, Lec. Buse KERİGAN, Lec. Mert AKYOL, Ress. Ass. Kevser Tuğba ÇINAR, Ress. Ass Hatice Zelal BİNGÖL and international students participated Creative Drama Workshop.

During the Creative Drama Workshop, Lec.Buse KERİGAN, a practicing trainer, talked about the history-characteristics of creative drama, its effects on children's developmental areas, the fields in which creative drama is used and the application steps of creative drama.

The creative drama workshop was started by playing introduction games so that the group could communicate interactively with each other.

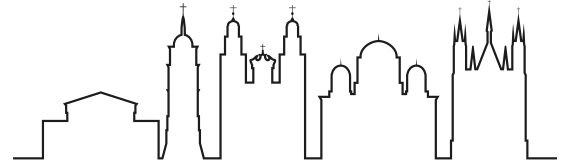

In the dating games, firstly, the students were helped to remember their names by using the ball, and then informative activities were carried out about their personal characteristics with the toilet roll technique. After the acquaintance games were completed, the posh-it game was played, allowing everyone to talk to each other within the time determined by the drama leader, and at the end of the 5-question question-answer activity, the person who collected the most names was chosen as the winner of the game. After the 3 games were completed, the empathy game, which is a relaxing game, was played in order for the participants to evaluate the process and manage their energies. For the empathy game, before the workshop, an empathy basket was prepared by the drama leader and different materials were placed in it. (Toothbrush, ball, socks, Band-Aid, banana, apple, syringe, ketchup, tu etc.). Before the participants were informed about the game, they were directed to choose the objects they wanted from the basket. After the participants took the objects, they asked them to empathize with the object they took by asking “..... if it were you, how would you feel?” Each participant was asked to make a statement.

In the last game of the creative drama workshop, some papers on which questions were written were distributed to the participants by the drama leader. Participants were asked to find the answers to these questions by walking around the group and asking each other. (Sample questions; who has a tattoo?, who can play the piano?, who can perform imambayildi? etc.) The creative drama workshop was completed in a pleasant way with the games.

Journey from Istanbul Gelisim University to Lithuania

Res. Asst. Hatice Zelal BINGOL

Hatice Zelal BİNGÖL, Research Assistant at Istanbul Gelisim University Faculty of Health Sciences Child Development Department, went to Klaipeda State University of Applied Sciences Faculty of Health Sciences in Klaipeda, Lithuania, within the scope of ERASMUS+ Staff Mobility, in Istanbul as part of the 16th International Week "Innovative Education". By conveying detailed information about Istanbul Gelisim University, it represented the innovative perspective of our university.

ERASMUS+ STAFF MOBILITY APPLICATION PROCESS

As the Erasmus+ Department Coordinator of the Child Development Department, a new agreement has been signed with the Klaipeda State University of Applied Sciences Faculty of Health Sciences in order to send our first student from the English Department of Child Development to Erasmus+ learning mobility. Upon the e-mail from the Erasmus+ office after the agreement, an application was made to go to the school with which we made a new agreement and to have the opportunity to meet with the Erasmus+ coordinators and department teachers face-to-face. Your eight-day Erasmus+ mobility, which started with the adventure of seeing a new country, getting to know new people and different cultures, leaves permanent traces in your life.

16th INTERNATIONAL WEEK "INNOVATIVE EDUCATION"

After a nice welcome, it has been a very valuable experience to take part in the international weeks and reflect the perspective of our university. In this way, while I had the opportunity to meet with professors from different countries, the first day of the congress was provided with the opportunity to convey ourselves and the characteristics of our own culture. Promotion was made by everyone by bringing different foods and beverages specific to their own culture. After all the participants introduced their culture, a tour of the city of Klaipeda was carried out with a guide.

“EDUCATION, RESEARCH AND INNOVATION IN HEALTH AND WELL-BEING STUDIES”

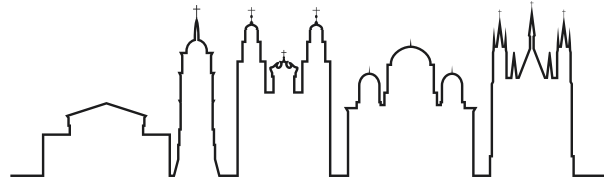

Participation in the "Education, Research And Innovation In Health And Well-Being Studies" congress. In the congress where the researches were presented, information was given about the innovation studies in the field of health. At the end of the congress, the opening of the “Nursing Simulation Center” was attended. In this simulation center; By observing how the process works in a hospital environment and introducing it with an innovative approach in the field of nursing, studies integrating technology and health were carried out. In the center; In order for the participants to take an active role, practices were carried out with guidance.

KLAIPEDA STATE APPLIED SCIENCES UNIVERSITY FACULTY OF HEALTH SCIENCES VISIT STUDENT DORMITORY

Klaipeda State University of Applied Sciences Faculty of Health Sciences student dormitory was visited. We met with students coming from different countries within the scope of Erasmus+ Learning Mobility and talked about Erasmus+ processes.

INTRODUCTION OF ISTANBUL GELİŞİM UNIVERSITY IN LITHUANIA

On the third day of the congress, academic staff from different countries were given the opportunity to introduce their schools and to provide information about the school and departments to the students. In the promotion; Materials with the Istanbul Gelisim University logo were presented to the students and professors at the congress. After the introductory presentation of our school was made, our promotional brochures were distributed to the students who wanted to get detailed information while answering the questions. In the introductory presentation, the success of our school and our students, accreditation in 63 departments, the opportunities our school provides to the students, the Department of Child Development and the departments that provide education in English, and the fact that the content of the department is 100% in English was mentioned.

PRE-SCHOOL AND PRE-PRIMARY SCHOOL PEDAGOGY DEPARTMENT VISIT

On the fourth day of the congress, the faculty members of the Klaipeda State University of Applied Sciences Faculty of Health Sciences University Pre-school and Pre-primary School Pedagogy department were met and the laboratories of the school were visited. By obtaining information about the course contents, the educational materials they designed were examined. They stated that the slogan they used in designing the materials was "Development Oriented". While detailed information was given about the curriculum of Istanbul Gelişim University Child Development Department, creative activities were carried out on child development. After the meeting, visits were made to pre-school education institutions in different regions. While getting detailed information about the education models implemented by the schools, the opportunity to make observations was provided.

NIDA ISLAND WHERE AT THE WESTERN POINT OF LITHUANIA AND THE BALTIC COUNTRIES

On the last day of the congress, a ceremony was held and participation certificates were delivered. After the certificate ceremony, a trip was organized to “Nida Island”, the westernmost point of Lithuania and the Baltic countries. The "Curonian Spit", which is under the protection of UNESCO, has been reached.

Nida Island is a region where desert, forest and sea views are intertwined. Thanks to the "Lighthouses" with 200 stairs in the forest, all the beauty of Nida Island was witnessed from a height of 51.4 meters.

I would like to thank Istanbul Gelişim University, Erasmus+ Office and my valuable professors for giving me this opportunity.

GET YOUR MAT AND COME TO YOGA EVENT

IGU Physiotherapy and Rehabilitation Club and IGU Physiotherapy and Rehabilitation Departments invite valuable academic and clinical physiotherapists to our university so that our students can see career opportunities and build a more planned future.

IGU Physiotherapy and Rehabilitation Club and IGU Physiotherapy and Rehabilitation Departments organized the “Get Your Mat and Come to Yoga” event on May 9 with the participation of Physiotherapist Gül Feride AKIN. AKIN and our students did yoga about an hour. After the yoga, the thoughts of the participants were taken. The event was then terminated.

1. OCCUPATIONAL THERAPY AND PHYSIOTHERAPY ACADEMIC FAREWELL DAY

An Academic Farewell Day was organized for 4. grade students on Tuesday, May 10, 2022, by Istanbul Gelisim University, Faculty of Health Sciences, Department of Occupational Therapy and Physiotherapy and Rehabilitation Departments (Turkish and English).

The program was followed by a moment of silence, the National Anthem, and the Dean of the Faculty of Health Sciences, Prof. Dr. Rifat MUTUŞ's opening speech started. Then, guest speaker Occupational Therapist Emre SAVAŞ gave his speech on "The Effects of Sensory Integration Therapy on Brain Development".

The presentation and exhibition of the posters prepared by the 4th grade Occupational Therapy and Physiotherapy and Rehabilitation Turkish-English Department students took place in the foyer area. Posters were evaluated by Prof. Arif ÖNDER and Assist. Prof. Berrak DUMLUPINAR.

The second guest speaker is MSc. Physiotherapist Ezgi Övünç GÜÇLÜER made an enlightening presentation on "Lymphedema Treatment and Therapy Processes". The last guest speaker was Occupational Therapist Bilge KAVALCI gave her speech on "Occupational Therapy and Nutritional Problems". The speaker also informed our students with the identity of the Occupational Therapy Association Representative.

1. OCCUPATIONAL THERAPY AND PHYSIOTHERAPY ACADEMIC FAREWELL DAY

A surprise was prepared for our students with the video shows of the students of the Turkish-English Departments of Occupational Therapy and Physiotherapy and Rehabilitation. Afterwards, the poster award ceremony was held. The best 3rd, 2nd and 1st Posters were awarded.

As the 4th grade students of the Occupational Therapy and Physiotherapy Department, the "Gonyometer Handover" ceremony was held for the 3rd grade students. Then, our 4th grade students were invited to the stage and the gifts prepared by the 3rd grade students were presented.

Finally, Vice Dean Assist. Prof. Abdullah Yüksel BARUT gave a farewell speech to all our students, especially their senior year, with advice that will shed light on their professional lives. Afterwards, the event ended with a photo shoot that took place when all the lecturers and students were invited to the stage.

19 MAY

Commemoration of Atatürk, Youth and Sports Day

Asst. Prof. Dr. Gülay TAMER

May 19, 1919, when our Great Leader Gazi Mustafa Kemal Atatürk started the liberation movement, is the milestone of our history and the greatest symbol of our struggle for independence. "Liberty or death!" The Turkish War of Liberation, which started in Samsun with the idea of the Turkish Nation, succeeded with the power of the Turkish Nation and our National Independence movement left its mark on world history.

The distinctive difference that distinguishes Atatürk from other world leaders is his trust in children and youth. The youth, who formed the future of our nation, reached the highest value judgment in Atatürk's opinion. Veteran Mustafa Kemal Atatürk, who saw the future of the republic in youth and young ideas, believed that the generations which will grow up with modern mentalities will further develop his work in the future and keep it alive by protecting it from all kinds of dangers. In the 19th chapter of the Speech, where he describes how and on what conditions the modern Turkish Republic was founded, he concluded with "A speech to the Youth", which he wrote and vocalized under the title "The Trust I Left to the Turkish Youth". For this reason, while entrusting the Republic of Turkey to the youth, he presented the day it started the war of liberation to the Turkish Youth.

On the 103rd anniversary of our National Struggle, we commemorate our Great Leader Veteran Mustafa Kemal Atatürk and his comrades-in-arms with respect, gratitude and mercy, who gifted this day, when he lit the torch of independence and light, to the Turkish Youth as "Youth and Sports Day".

Happy "19 May Commemoration of Atatürk, Youth and Sports Day" to Turkish youth!

Bülent SAKA Talks About Murat DİLMENER (1941- 2020)

WHO IS
WHO?

Edited by-Interview: Assist. Prof. Gülay TAMER

Professor DİLMENER was born on October 10, 1941 in Mardin. After completing his primary and secondary education in Mardin (1948-1959), he won the Istanbul Faculty of Medicine and graduated from the Istanbul Faculty of Medicine in 1965 as a Medical Doctor. He worked in Mardin and Şırnak Central Health Centers, respectively, and worked at Admiral Bristol Hospital between 1973-1974.

In 1974, he started his specialization in Internal Medicine at Istanbul Medical Faculty. He received the title of Internal Medicine Specialist in 1978 and continued to work as a chief assistant in the Internal Medicine Clinic of Istanbul Medical Faculty. In 1983, he completed his thesis titled "Examination of Various Diseases of the Gallbladder and Its Paths with the ^{99m}Tc-Hida Cholescintigraphy Method and Comparison with Other Radiological Methods" and received the title of Associate Professor. He started to work in the Department of Clinical Bacteriology and Infectious Diseases in 1985. He became Professor of General Internal Medicine in 1988 and Professor of Clinical Bacteriology and Infectious Diseases in 1991. Between 1991-1998, he served as the Head of the Department of Clinical Bacteriology and Infectious Diseases. In 1999, he was assigned to the Department of Internal Diseases, General Internal Medicine Department, and served as the Head of the Department of Internal Diseases for 3 terms until 2008.

Professor DİLMENER is married and has 3 children. There are a total of 179 domestic and international publications and book chapters. He was fluent in English and Arabic. Among the foundations of which he is a founding member are the Turkish Infection Foundation, Avni Sözen Anatolian High School Foundation and Mardin Education Foundation. He served as the Internal Diseases Representative at the Istanbul Medical Faculty Foundation. Among the associations he is a member of are the Internal Medicine Education and Solidarity Association, Behçet's Disease Association, Turkish Medical Association, ANKEM Association, KİLİMİK Association and Istanbul University Faculty Members Association.

Prof.Dr.Murat DİLMENER (1941- 2020)

Professor DİLMENER's memorable features while he was working at the Istanbul Medical Faculty include reading a lot, being a hardworking, disciplined and full duty person, benevolent personality, and a life free from arrogance and ostentatiousness. He valued his patients very much, always felt that the other person was human, taught that this was the foremost, and was often reminded during his visits. He always taught something to his students and the physicians around him, by constantly asking questions and then answering them in detail. Besides the medicinal properties of diseases, he liked to talk about the history of medicine and the discoveries and discoverers of diseases. During the time I worked with him, I witnessed that he conveyed to us what he learned from previous generations with his seriousness, narratives and evaluations in bedside visits, adding the atmosphere of that time. In a way, our dear teacher, who worked with many teachers who led the development of medicine from the foundation of medicine in the Republic of Turkey, was determined to keep the teachings and feelings of those days alive in front of us. Professor Dilmener and other Professors from the same period were people who played the role of conveying the teaching of medicine between us and past generations. They handed us that flag.

Prof.Dr.Murat DILMENER (1941- 2020)

Everyone knows that our dear teacher is friendly with patients. Those who know him have witnessed many times that he never did his job for money. She used to say that she knew very well what absence is from the geography where she was born and raised. Because of this feature, he has been called the doctor Robin Hood

Professor DILMENER retired as of 10.10.2008 due to age limit. At the very beginning of the COVID pandemic, which has extremely severe consequences in our country and in the world, our dear teacher caught this infection and passed away on May 3, 2020 due to COVID 19. With all these features, its name has been written in bold letters on the list of unforgettable memories

Lives Lost: A doctor dubbed 'Turkey's medical 'Robin Hood'

An advocate for free health care, Dr. Murat Dilmener sometimes bent hospital rules in Istanbul to ensure without health insurance got the treatment they needed

By SUZAN FRASER Associated Press

WE CELEBRATE 20 MAY CHILD DEVELOPERS' DAY

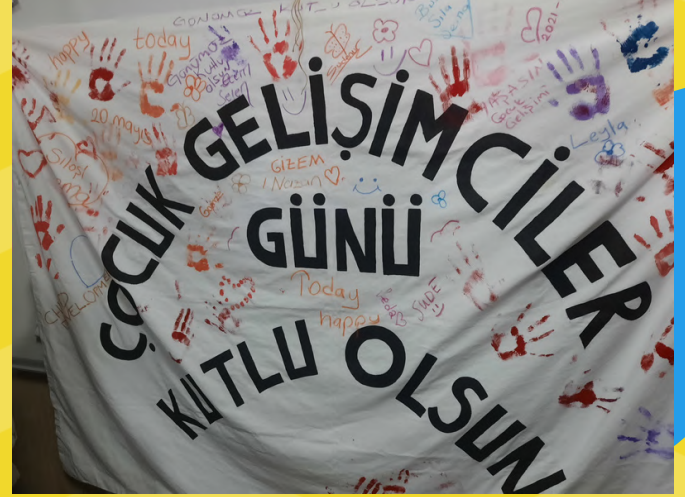

Celebrating 20 May Child Development Day event organized by Istanbul Gelisim University Faculty of Health Sciences Department of Child Development (TR-ENG), It was moderated by Head of Child Development (TR) Department Dr. Nurten ELKİN.

To the event; Deputy dean of the Faculty of Health Assis.Sciences, Assist. Prof. Abdullah Yüksel BARUT, Prof. Dr. Nefise Semra ERKAN, Prof. Dr. Arif ÖNDER, department of head of Child Development (ENG) Prof. Dr. Ebru KOLSAL, department of head of Child Development (TR), Assis. Prof. Nurten ELKİN, Assis. Prof. Deniz YILDIZ, Lect. Buse KERIGAN, Lect. Berk Efe ALTINEL, Res. Ass. Kevser Tuğba CINAR, Res. Ass. Hatice Zelal BINGÖL, our students and graduates.

In the event; After the speech of its moderator Nurten ELKIN in accordance with the meaning and importance of the day, the feelings and thoughts of our graduate students were taken.

From our graduates;

Beyza GÜNAYDIN; She talked about the fact that participating in classes interactively throughout her student life improved her, that the lessons were student-centered, and the experiences she gained during her internships. Organized by Istanbul Gelisim University Faculty of Health Sciences, she stated that the "National Health Sciences Student Congress" was an event that guided her to reach the traces she left on herself and the information that gave her direction to her professional life. GUNAYDIN concluded her speech by saying that she is currently working as a child developmentist at the Special Education and Rehabilitation Center and that she has a master's degree in the Development of Child program of Istanbul Gelisim University

Büsra AKDAG; She stated that the National Health Sciences Student Congress was the turning point. She stated that the presentations and practical lessons she made during her student years contributed to her professional development. AKDAG concluded her speech by saying that she is currently doing her master's degree in the Child Development program of Istanbul Gelisim University and that diameter training continues in the Department of Nutrition and Dietetics.

Ayça Gizem UREN; She stated that she determined the field she wanted to work in with the vocational education practices she had done during her student life. UREN concluded her words by stating that she was working as a child development in the preschool institution where she carried out her vocational training practice.

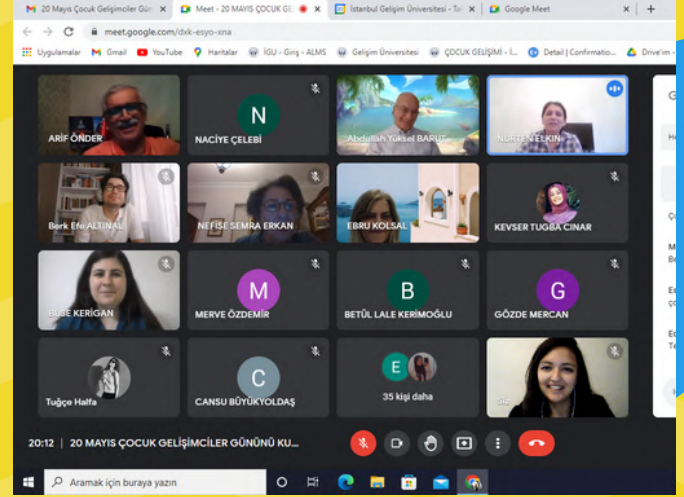

Soner YANIK; He stated that he used both the theoretical and practical knowledge he received throughout the education process in his professional life, and stated that he participated in voluntary internship movements in various institutions and did internship in 17 places in total. YANIK completed his words by saying that ı worked as a child development specialist at the Special Education and Rehabilitation Center, that ı had a master's degree in the Child Development program of Istanbul Gelişim University, that you continue your education in Nutrition and Dietetics, and that your minor education in Psychology continues at the same time.

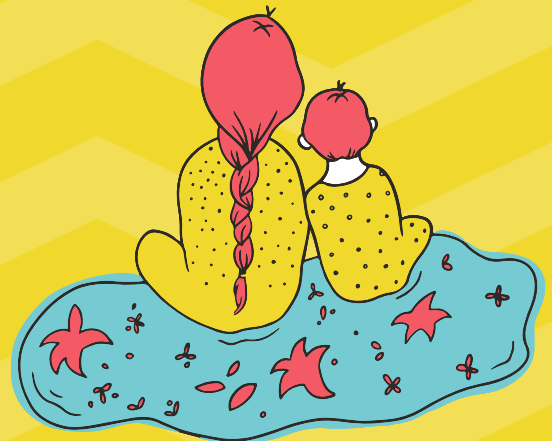

After our graduates, one of the faculty members of our department and also our graduate student, Res. Asst. Hatice Zelal BINGOL gave a speech. Development of Child (ENG) head of department Prof. Dr. Ebru KOLSAL stated that success will come with the interactive participation of the students in the applications made during the lessons.

Abdullah Yüksel BARUT, vice dean of the Faculty of Health Sciences, started his speech by celebrating the 19 May Youth and Sports Day. He emphasized that seeing the professional practice courses during their education and playing an active role in these courses will bring them success.

Prof. Dr. Nefise Semra ERKAN started her speech by stating that 47 years have passed since her undergraduate degree. Who is a “child development specialist” when choosing a profession? She stated that the absence of anxiety makes her happy and that the students are conscious. She stated that the department of child development is a multidisciplinary field and that it plays a major role in raising and shaping children who are the representatives of our future. She said that child development workers work simultaneously with family–society–child and it is important for the education of the society. She concluded by saying that the child inside her always kept her alive and she felt lucky.

12TH MAY INTERNATIONAL NURSES DAY EVENT

'We Celebrate May 20 Child Development Experts Day' event organized by Istanbul Gelisim University Faculty of Health Sciences Child Development Program (Turkish-English) was moderated by Asst. Prof. Dr. Nurten ELKİN, Head of Child Development Department (Turkish)

The event started with the opening speech of Nursing (Turkish) Department Lect. A. Mucella SOYDAN. Following SOYDAN, Asst. Prof. Dr. Abdullah Yuksel BARUT (Vice Dean of Istanbul Gelisim University Faculty of Health Sciences) and Assoc. Dr. Handan ALAN continued with their speeches. The event was held in Turkish and English, also Nursing (English) students Oguzhan BİLEN and Arman ERDOGAN contributed to the event with their English translations.

ALAN, mentioned about contemporary roles such as educator, guidance counselor, consultant, decision maker, manager, coordinator, human understanding, time and energy management skills as well as caregiver roles of nurses, who were fighting on the front lines during the Covid-19 pandemic process and whose professional importance is remembered once again, in her presentation. The theme "Nurses: A Pioneering Voice – Invest in Nursing to Secure Global Health and Respect Rights", determined by ICN for the International Nurses Day, was discussed interactively with the students.

In the continuation of the event, the "Health Education Materials Development Contest" awards held among Nursing students found their owners. Plaques were given to the first, second and third winners determined by the jury in line with the models they created. Semanur KULA, a 2nd year student from the Department of Nursing (Turkish), who participated in the competition with the theme of "Reproduction, Growth and Development", was the winner of the competition. Nursing (English) 1st year student Haseena NOOR, who visualized the "Structure of the Heart", came in the second place in the competition. Nursing (Turkish) Department 3rd year student Mazhar OKAN, who won great acclaim with his three-dimensional mannequin showing the "Circulatory System", finished third in the competition. Nursing Club advisor and Head of Nursing (English) Department, Asst. Prof. Dr. Funda KARAMAN presented their gifts to the other students who participated in the competition with the models they created, accompanied by wishes and wishes.

At the end of the event, Istanbul Gelisim University music group "Grup Agah" took the stage. The event, which was held with the support of the Istanbul Gelisim University Music Club, ended after the concert.
