NEWS FROM IGU

Acedemicians from IGU are on the List of the Worlds and Countries 'Best Sciences

Research.com, one of the world's leading research and academia portals, has announced the list of the "Best Scientists" of the world and countries.

Among the valuable academicians of our university, in the list prepared on the basis only for their studies related to their own fields;

- Prof. Dr. Bahri Şahin, Rector of Istanbul Gelisim University, ranked 17th among 47 scientists from Turkey and 4020th in the world in the field of Engineering and Technology.
- Prof. Dr. Kemal Sıtkı Türker from the Faculty of Dentistry ranked 4th among 6 scientists from Turkey and 5870 in the world.
- Asst. Prof. Dr. Festus Victor from the Faculty of Economics, Administrative and Social Sciences of IGU was the only scientist from Turkey to be ranked in the field of Economics and Finance, and he was ranked 1183 in the world.

We congratulate our esteemed academicians who successfully represent our university and our country and wish them continued success.

Click below to access the lists:

- Engineering and Technology: <https://research.com/scientists-rankings/engineering-and-technology/tr>
- Neuroscience: <https://research.com/scientists-rankings/neuroscience/tr>
- Economics and Finance: <https://research.com/scientists-rankings/economics-and-finance/tr>

The banner features the IGU logo and the text: "Research.com İGÜ'LÜ AKADEMİSYENLER DÜNYANIN VE ÜLKELERİN 'EN İYİ BİLİM İNSANLARI' LİSTESİNDE!". Below the text is a table with the following data:

BİLİM BİLİMİ	BİLİM ALANI	TÜRKİYE'DEN SEÇİLMİŞ AKADEMİSYENLERİN SAYISI	TÜRKİYE SİRALI AMACI	DÜNYA SİRALI AMACI
İNJEKÖN MÜHÜR BİLİMİ	MÜHÜR BİLİMİ	47	17	4020
İNJEKÖN MÜHÜR BİLİMİ	MÜHÜR BİLİMİ	6	4	5870
İNJEKÖN MÜHÜR BİLİMİ	MÜHÜR BİLİMİ	1	1	1183

NEWS FROM FoAS

SHY-147 Recognized School B2 Avionics Laboratory Opening Ceremony of Faculty of Applied Sciences was Held!

SHY-147 Recognized School B2 Avionics Laboratory within the body of Avionics Department of the Faculty of Applied Science (FoAS) was inaugurated on 22.05.2023 with the participations of Istanbul Gelisim University Rector Prof. Dr. Bahri Şahin, Vice Rectors Prof. Dr. Nuri Kuruoğlu and Prof. Dr. Necmettin Maraşlı, FoAS Dean Prof. Dr. Kamil Kaya, Dean of the Faculty of Dentistry Prof. Dr. Mahir Günday, Director of Istanbul Gelisim Vocational School Assist. Prof. Dr. İsmail Cem Ay, FoAS Vice Deans and Faculty Members and students.

At the opening ceremony of the laboratory located in the classroom number 086 in the G-Block Vocational School campus, Dean of the Faculty of Applied Sciences Prof. Dr. Kamil Kaya underlined in his speech the fact that the laboratory is unique in Turkey, as well as its superior and different technical features that offer students the opportunity to perform a wide variety of applications.

NEWS FROM FoAS

At the opening ceremony of the laboratory located in the classroom number 086 in the G-Block Vocational School campus, Dean of the Faculty of Applied Sciences Prof. Dr. Kamil Kaya underlined in his speech the fact that the laboratory is unique in Turkey, as well as its superior and different technical features that offer students the opportunity to perform a wide variety of applications. Prof. Dr. Kamil Kaya stated that IGU/ FoAS Avionics Department is one of the few in Turkey with the "Recognized School" status authorized by the Directorate General of Civil Aviation (DGCA) within the scope of B2 Avionics. Dean Prof. Kamil Kaya said that: "Our students take B2 Avionics category SHY 66 module courses in addition to YÖK courses. At the end of the academic year, students who both meet the course success criteria set by the Council of Higher Education (YÖK) and who are successful in SHY 147 Task application trainings are eligible to take module retention exams and are entitled to receive the SHY 147 Recognized School certificate together with their undergraduate diplomas. SHY 147 TASK training is an applied training and is given by instructors with industry background in full-fledged laboratory environments approved by the Directorate General of Civil Aviation (DGCA). The inaugurated B2 Avionics Laboratory is an educational establishment equipped with synthetic training sets required for TASK trainings and meets the criteria of DGCA." Dean Prof. Dr. Kamil Kaya also expressed his gratitude to Mr. Abdülkadir Gayretli, Chairman of the Board of Trustees, and all those who contributed to the establishment of the laboratory.

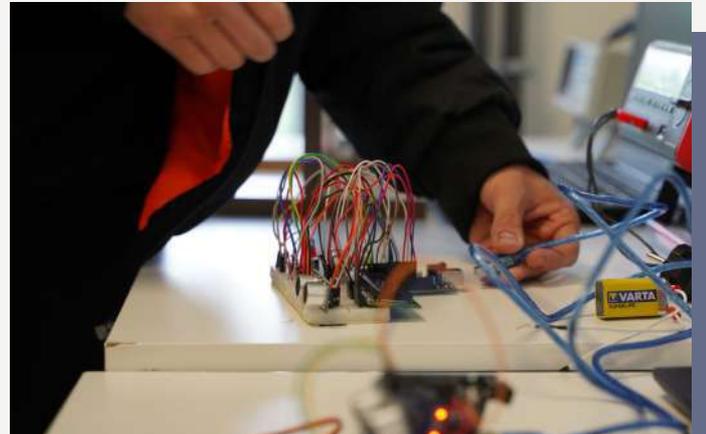

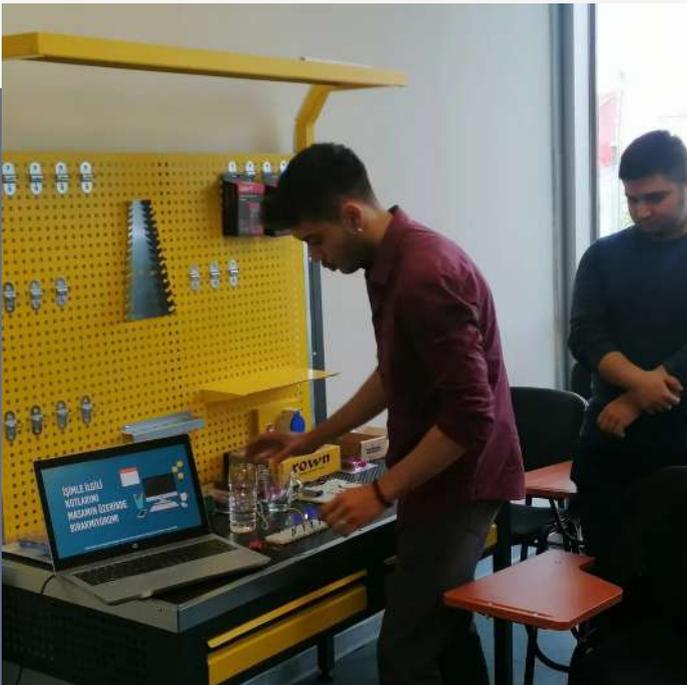

Later, IGU Rector Prof. Dr. Bahri Şahin stated that he is delighted to have 147 Recognized Schools B2 Avionics Laboratory, which offers a wide application area to students in terms of technology.

NEWS FROM FoAS

After the opening speeches, the ribbon cutting took place thereafter the laboratory was visited and examined, and Lecturer Mehmet Ateş from the Aircraft Maintenance and Repair Department showed the participants and students the applications of the Fire Warning System Training Set and Flight Simulation Training Set in the laboratory and explained the working principles. Avionics1st and 2nd grade students presented the circuits and projects they had previously made in laboratory courses to the participants and fellow students.

Later, Rector Prof. Dr. Bahri Şahin and the participants visited the other aircraft laboratories under the guidance of Lecturer Mehmet Ateş after the inaugurated B2 Avionics laboratory and informed about the aircraft class-laboratories and related equipment.

Istanbul Gelisim University has more than one department recognized by DGCA. In addition to 10 SHY-147 Recognized School laboratories established with the support of our Chairman of the Board of Trustees Abdulkadir Gayretli for these departments, there is also Pilot Melike Kuvvet Aircraft Hangar-Cessna 340A aircraft in Block J.

Simultaneous Translation Laboratory Opening Ceremony was Held!

The opening ceremony of the Simultaneous Translation Laboratory, organized by the Dean of the Faculty of Applied Sciences and the Department of English Translation and Interpretation, was held on Monday, May 8, 2023, between 10:00 and 11:00 in A Block FoAS E-212, with the participation of Chairman of the Board of Trustees Abdülkadir Gayretli, Rector Prof. Dr. Bahri Şahin, Vice Rectors Prof. Dr. Nuri Kuruoğlu and Prof. Dr. Necmettin Maraşlı, Dean of Faculty of Applied Sciences Prof. Dr. Kamil Kaya, Faculty of Applied Sciences Deputy Deans Assist. Prof. Dr. Nevruz Berna Tatlısu and Assist. Prof. Dr. Sevinç Koçak, Head of English Translation and Interpreting Department Assist. Prof. Dr. Görsev Sönmez and faculty lecturers and students. The ceremony, which started with the opening speeches and ribbon cutting, ended with the promotion of the Simultaneous Translation Laboratory equipment and the simultaneous translation practice.

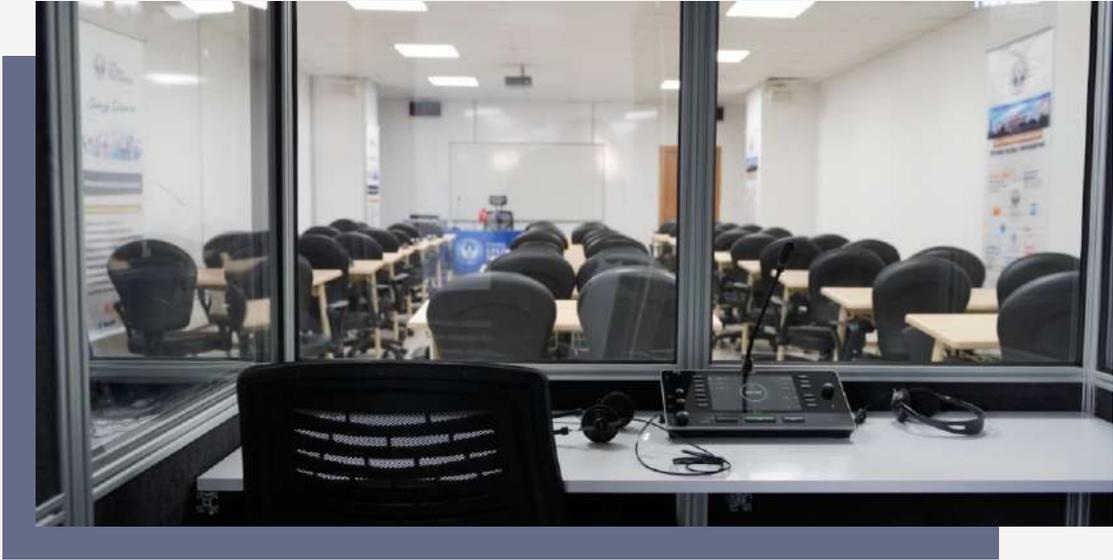

In the Simultaneous Translation Laboratory, an environment is created in which students can perform both consecutive and simultaneous translation practices. Accordingly, there are three cabinets in the laboratory that allow interpreting. Each of these booths allows two interpreters to make simultaneous translations in different language pairs at the same time. On the other hand, with the help of the desk microphone and the traveling microphone in the laboratory, the seminar, conversation and interview environments can be animated and consecutive translation application can be carried out. Students, who have the opportunity to put theory into practice, look for solutions to translational problems that may arise during translation process with these simulations.

NEWS FROM FoAS

The state-of-the-art DICENTIS system developed by Bosch, a multinational technology and engineering company, is used in the Simultaneous Translation Laboratory. This system is a conference system designed to facilitate communication and cooperation between participants in meetings and conferences. The DICENTIS conference system consists of various components such as wired and wireless interpretation units (Translator Headphones, Digital Modulator, Sound Processor and Switch Unit) and multimedia devices (8-Channel Digital Infrared Pocket Signal Receiver, Radiators). The conference units are equipped with high quality microphones and speakers that provide clear sound for the participants in the meeting. 40 students could check simultaneous translations done in the booths on any channel, thanks to the mobile signal receiver and earphones.

The Simultaneous Translation Laboratory with 3 booths and capacity of 52 students has started to be used for the courses of the Department of English Translation and Interpreting as of the 2022-2023 Spring Semester.

Digital Communication and Technology Laboratory Opening Ceremony Held!

The opening ceremony of the Digital Communication and Technology Laboratory organized by the Faculty of Applied Sciences, Public Relations and Advertising, Television Reporting and Programming, New Media and Communication departments was held with the participation of Abdülkadir Gayretli, Chairman of the Board of Trustees, Rector Prof. Dr. Bahri Şahin, Vice Rector Prof. Dr. Nuri Kuruoğlu, Dean of the Faculty of Applied Sciences Prof. Dr. Kamil Kaya, Vice Dean Prof. Dr. Nevruz Berna Tatlısu, Head of Public Relations and Advertising Department Assoc. Prof. Dr. Nevruz Berna Tatlısu, Head of the Department of Public Relations and Advertising Assoc. Prof. Dr. Emel Tozlu Öztay, Head of the Department of New Media and Communication Assoc. Prof. Dr. Şebnem Gürsoy Ulusoy, Head of the Department of Television Reporting and Programming Assoc. Prof. Dr. Hande Ulusoy, faculty lecturers and students on 26.05.2023 at 10:00 on 26.05.2023 at J Block.

The ceremony started with opening speeches and ribbon cutting and continued with a tour of the application exhibition consisting of the works of the students of the Public Relations and Advertising, Television Reporting and Programming and New Media and Communication departments and the introduction of the technical equipment in the laboratory.

NEWS FROM FoAS

The inauguration ceremony of the Digital Communication and Technology Laboratory ended with the product table shooting practices carried out by the Chairman of the Board of Trustees Abdülkadir Gayretli and Rector Prof. Dr. Bahri Şahin with the slogan "No End to Development!".

The Digital Communication and Technology Laboratory is designed to provide students with the opportunity to practice along with theoretical knowledge. In the laboratory, where state-of-the-art cameras, shooting accessories, sound and light sources are available, students have the chance to perform Black Box and Green Box shooting applications as well as product table shooting applications. The laboratory offers an environment where the industry is simulated in the fields of new media applications, television programming and advertising. The equipment in the laboratory is regularly renewed and updated in line with the needs.

Social media handles for the university and department are also provided.

NEWS FROM OUR ALUMNI

Naciye SÖYLEMEZ

Social Worker / Fatih Municipality

The story of my journey in studying the department at IGU began with the "social work" option that my geometry teacher dictated to my preferences while I was in high school. I tell this coincidence with a smile every time. The reason I smile today is different. Learning eclectic information about all social sciences in each of my years in the IGU "Social Work" department motivated me to read my department even more fondly. At the end of high school, I only had thoughts such as what kind of work I wanted to do and where I wanted to see myself, but I couldn't find out which department and profession it was in.

I have always been a strong person in communication with people, since middle school. The reasons why I consider my communication strong are; I am not ashamed to speak in public, I only comment on a subject that I do not know as much as my own ideas; otherwise, when there is something I do not know, I would say it frankly and immediately go and research it. I would never avoid talking about my friends' problems and would do my best to be a solution to them, and I would find my interlocutor and talk to them as soon as I could stop and wait for someone to understand my own problems. Otherwise, I would never feel comfortable. Since someone who does not marginalize or discriminate among my friends or people, I would accept him, and I would think that maybe just keeping a distance from doing harm would be enough.

Students studying social work will understand me very clearly here, I was also aware that I could not tolerate injustice and that I had a habit of "advocacy" that was valid for everyone I did not know. The first time I realized its place in social work during my undergraduate education, I was very excited to turn this habit into a professionalism. Here, my geometry teacher, with whom we have a healthy communication and who reflects to us that he loves us and his job, will have experienced some realizations in my temperament, as I have expressed many times, so that he told me that I could also research the social work department, which started my university adventure. I started to dream, to get excited and to research where and how I could study this department.

NEWS FROM OUR ALUMNI

Naciye SÖYLEMEZ Social Worker

One of the things I loved about IGU from the first year to the last year was to study in a peaceful and qualified environment. I believed that the wide range of opportunities and the peacefulness of our university would bring luck to all of us. Our professors, who were experts in their fields, introduced us to the positive aspects of the profession along with all the difficulties, and opened horizons by recommending various books.

After the first year of getting used to both the university and the social work department, we were gradually reaching the qualified academic level required at the undergraduate level. In the following years, the "theories" that made us feel that we were stepping into professionalism in the field of social work were now getting involved and the education was more enjoyable. With our new terms and professional concepts, our SHU eye was now looking at the world, events and phenomena from the perspective of "social justice". The awareness of what a social worker means was settling in the minds of each of us. We knew that the strongest hand of the social worker was a professional intervention for dysfunctional individuals and families and the importance of SIR (Social Investigation Report) reporting.

For me, a lecturer at university meant everything. For us, it meant the deepening motivation that was reflected to us by the professors with deep knowledge. Sharing their professional knowledge, field knowledge and theoretical knowledge with us closely was the most beautiful aspect of our pleasant lessons at our university.

In recent years, I have begun to understand the difference between being progressive and being "Open to Development" much better. One of the activities that our teachers got us used to during this undergraduate period was to read a lot and to do book summaries. Recommended book titles, articles, photocopies, printouts... Recommended series, movies...

In addition to my compulsory internship, I can say that my volunteer internship was very beneficial for me to learn the job from the kitchen and to see the field, and it gave me a lot of experience. I could understand the education I received and the quality of what I learned from my conversations with fellow students from my other field during the internship, and from my conversations with friends from my other field in environments such as seminars and symposiums I attended.

NEWS FROM OUR ALUMNI

Naciye SÖYLEMEZ Social Worker

In the last year, we had learnt to do resource research and access foreign resources, while the last exams and thesis writing process. The saddest part of our graduation was that it coincided with the pandemic. In 2021, it was an exhausting and exciting process that all exams and the submission process of the thesis were over. Prof. Dr. İsmet Galip YOLCUOĞLU, who is the academician who produced the most books in our profession, joined the staff of IGU in February 2019 when we were in the 3rd grade, which excited us all. Indeed, our teacher's more than 30 years of academic and practical experience opened very wide horizons for us and allowed us to gain vision as the most in-depth SHUs of our country. After receiving my diploma in June 2021, I prepared a CV and left it to the institutions with suitable working conditions.

My kindergarten experience, where I worked for 2 months after graduation, ended with my own consent, because I couldn't see myself happy there and not being happy made me unproductive in my job. After I quit my job, I entered the process of waiting for the return of my job application from the district municipality. In this process, I decided to get an education that I wanted for a very long time. Announcer and reporter course. While the training was continuing, I was called for an interview from Fatih Municipality Communication Center and was hired. I realized the connection between Social Work and the Communication Center shortly after I started working. In both cases, regardless of the subject, there was a client, the focus was people, and communication was very important over the phone as well as face-to-face.

All of this actually corresponded to the field applications of social work in our knowledge of "working with the community" theory. I continued to educate myself by turning to more in-depth books and my position in Fatih Municipality started to become more solid.

In a short time, I started to guide the groups in the tour program where the services of the municipality were introduced at the Directorate of Press and Public Relations. However, with the support of our manager, I started to face the camera in the works of digital media. Even my business made me happy when the works that I loved to do were gathered together. After 1.5 years, I was transferred from the communication center to the Directorate of Press and Public Relations as a position. At the moment, I am carrying out the activities of travel guide, reporter, organization and field follow-up in the follow-up of the president's program.

I will always be honored and proud to be a social work graduate of IGU and to be a part of such a big family...

MAY GUEST WRITER

BARRIER-FREE EDUCATION IN HIGHER EDUCATION...

According to the World Health Organization (WHO), disability is a complex, dynamic, multidimensional and controversial concept. WHO defines disability as a limitation or inability in the process of performing any activity within the limits considered normal. On the other hand, disability is defined as the restriction or inability to fulfill the expected roles of the individual based on age, gender, social and cultural factors due to a disability or handicap (WHO, 2011: 3-4). According to another definition, disability is the difficulties encountered in performing the activities of daily life, either congenitally or later, physically, mentally or psychologically, partially or completely (Inan et al., 2013: 725).

Assist. Prof. Dr. Görsev Sönmez
Head of Department of
English Translation and
Interpretation

According to the World Disability Report published by the World Health Organization (WHO) in 2011, 15.6% of the population over the age of 18 is disabled (WHO, 2011: 27). In our country, it is stated that 6.9% of the total population had at least one disability in 2011, according to the 2011 Population and Housing Survey conducted by the Turkish Institution (2011). As a result of the transition to higher education exam held in our country in 2017, the number of students with disabilities enrolled in associate (1545) and undergraduate (1278) programs is 2823 students. Of these students, 26.4% are other disabled, 26.1% are physically disabled, 24.8% are visually impaired, 18.1% are hearing impaired, and 4.6% are temporarily disabled. Melekoğlu, 2017).

According to Article 42 of the Constitution of the Republic of Turkey, “No one can be deprived of the right to education and training.” According to the Social Services and Child Protection Agency Law No. 2828, which was published and entered into force on July 17, 2005, the disabled person is defined as “a person who is in need of protection, care, rehabilitation, counseling and support services, who does not comply with the requirements of normal life due to the loss of physical, mental, spiritual, emotional and social abilities at various degrees as a result of congenital or subsequent illness or accident.” (Tekin, 2019).

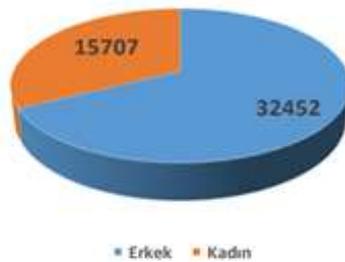

MAY GUEST WRITER

In the Law No. 5378 on the Disabled, the disabled refers to the individual who is affected by the attitudes and environmental conditions that restrict his full and effective participation in the society on equal terms with other individuals due to the loss of his physical, mental, spiritual and sensory abilities at various levels. In a sense, it can be said that the individuals we describe as “disabled” are victims of the environment (Karakuş et al., 2017: 2578).

The right to education, which is a fundamental right that all individuals have and is guaranteed by national and international legal regulations, has revealed that all children should be protected without discrimination with the Universal Declaration of Human Rights (1948), the United Nations Convention on the Rights of the Child (1989), the European Social Charter (1961; 1996) and the Convention on the Rights of Persons with Disabilities (2009). In accordance with this legislation, the state should make plans to ensure that individuals with disabilities receive education at all levels within the general education system, necessary measures should be taken to include individuals with disabilities who have started their formal education programs late for different reasons. Article 26 of the Universal Declaration of Human Rights also refers to education and emphasizes that primary and secondary education should be free and that higher education should be open to everyone with full equality (www.tbmm.gov.tr).

According to the results of the survey conducted throughout our country in 2020, the data presented below is at a substantial level.

	Erkek (%)	Kadın (%)	Toplam (%)
Engelli Öğrenci Sayısı	32.452 (67,39)	15.707 (32,61)	48.159 (100)

MAY GUEST WRITER

ANKETE KATILAN YÜKSEKÖĞRETİM KURUMLARINDAKİ ENGELLİ ÖĞRENCİLERİN ENGEL TÜRLERİ

Toplam	48.159	100,00

The following statements are included in order to take the necessary measures within the framework of possibilities in order to make education in higher education institutions as accessible as possible to our students with disabilities:

- It should be determined whether there are students with disabilities in the relevant programs of the universities and the lecturer should be informed about the precautions to be taken according to the disability group.
- Measures should be taken to eliminate the problems experienced in the live lesson platform by contacting students with disabilities for live lesson connections.
- These students should also be informed in writing about the distance education systems used.
- Measures such as providing the course content as text for hearing impaired students, giving lectures with subtitles if possible, sending the course content to the student as text in advance, paying attention to the use of rich text formats that can be used by the reader systems of our visually impaired students, using large font and contrasting colours in presentations, describing visual content, graphics and tables during lectures, describing graphics especially in exams, allowing additional time in exams according to disability status should be evaluated.

MAY GUEST WRITER

- Care should be taken to ensure that a small number of students with intellectual disabilities and autism spectrum disorders are not disconnected from higher education, contact with the family and the student at regular intervals, and if necessary, support from academics from psychology and other fields should be provided within the possibilities.
- If students with chronic illnesses apply with this condition, their needs should be evaluated within the framework of their illness.

As a result, keeping in mind that every individual is a candidate for disability, it is of great importance to implement the suggestions for barrier-free education in higher education institutions as much as possible.

MAY INTERVIEW

BARRIER-FREE CAFE OWNER FERRUH KALEDİBİ:

“We are trying to exist everywhere together with the other members of the society with the slogan of “We Are in Life!””

Thank you for accepting our FoAS Monthly E-Bulletin interview request. What is a barrier-free cafe? What prompted you to open a barrier-free cafe? Can you tell our readers about these processes?

I opened the barrier-free cafe to show that private individuals can participate in social integration and employment, and that they can produce something like normal individuals. I am also the father of a 25-year-old child with Down syndrome. My awareness started with the development of my child. Awareness always starts to form after the first steps of an entrepreneur. I also have different businesses serving in this field. We set out from my belief that private individuals can do something. Currently, 5 mentally handicapped individuals are working in our restaurant business. Such businesses are protected and licensed by the ministry of family social policy.

MAY INTERVIEW

What kind of services are provided in the disabled cafe? What kind of activities and projects are there besides serving as a cafe?

Our establishment, which we established in 2015, serves many things from breakfast to à la carte world cuisine. We have everything from hot to cold drinks. In short, we can provide all the services you expect from a cafe. Our colleagues have made a great contribution to the families of other individuals with special needs who are like themselves. Every family has become a hope by seeing our employees for the answer to the question of what they will be and what they will do when they grow up. The education they will receive in each period will reinforce their being in life. With the motto of "We Are In Life", we try to exist everywhere together with other members of the society, from sports competitions to exhibitions, we strive to live together. Instead of hearing words like we love you as individuals with special needs, make room in your workplaces with the quotas in your heart, instead of the quotas set by the state in your workplaces by allocating a place in your class for us. Instead of being remembered on 3 December, 21 March, 2 April, 10-16 May, let every day be together. In addition, instead of working only through cafes, we want to work in areas such as packaging, greenhouse and ornamental planting, cleaning, hotel floor attendants, which can be done by individuals with special needs.

Should barrier-free cafes be seen as a commercial enterprise or a social responsibility project? What are your thoughts on this?

Accessible cafes should be seen as a business enterprise. These businesses can be long-term by turning themselves. Having a pitying approach to employees destroys the sustainability of businesses. It should be able to compete with other businesses, individuals with special needs should be able to do their jobs in the best way, if you cannot improve their inadequacies. If you do not give good education on this subject, if you behave tolerantly, you will hinder development. The worst part of such businesses is failure. At the end of the failure, the operator may go bankrupt and move on to another job, but since the business is known as the place of individuals with special needs, the society says, "Oh look, individuals with special needs couldn't do it" and there is an image that they can't do this. Disadvantaged group businesses have such a risk. For all these reasons, the state should have follow-up support in this regard. In places rented from the public or municipalities, priority should be given on the condition that the rental price is within the scope of support, the same product, the same work, the same price in the tenders. Supports such as tax and SSI premium support are necessary for sustainability.

MAY INTERVIEW

How do barrier-free cafes contribute to the development of special individuals? Can we say that barrier-free cafes offer employment and socialization opportunities to private individuals?

Our cafe was established with the motto of "We Are In The Working Life" of individuals with special needs. When our individuals joined working life, both their private and social lives have changed significantly. Not only did they change themselves, they helped society break their prejudices about these individuals. 27 personnel were transferred to other workplaces in our cafe. Thanks to the self-confidence and the subconscious mind of the employers, they have been supported by the employers, thanks to the breaking of the mentality that they can't do anything.

We find this interview with you very valuable in order to increase the awareness of our students. Thank you very much for your time and the comprehensive information you provided for the FoAS Monthly E-Bulletin.

Thank you.

ERASMUS+

Erasmus+ Mobility in Central Europe...

Greetings, I am Istanbul Gelisim University FoAS International Trade Department Research Assistant Nuran Aktaş. I would like to share with you my visit to Žilina University in Slovakia in April 2023 as part of Erasmus+ Staff Training Mobility and my experiences there.

First of all, one of the reasons I chose Slovakia is that it is one of the countries that left the Soviet Union therefore it was related to my master's thesis. It was important to fill this gap in my thesis to experience a place where I had never seen before, but which I theorized with the data I acquired only by reading and researching. On the other hand, I chose this place because I thought it contributed positively to my cultural development.

If I give road advice for those who wish to visit this country, there are no direct flights to Slovakia. For this reason, I first went to Hungary, and from there I reached Slovakia. Even though Erasmus+ mobility is education-oriented, I couldn't help experiencing the historical texture of Hungary and spent a few days there. I met the Erasmus+ coordinator on the day and time determined at the university where the mobility will take place. I attended the orientation presentation prepared for me. With this orientation, I had the opportunity to learn about general information about the university, campus information, collaborations and opportunities. After the orientation presentation, a campus tour was held and then I attended the training at the time specified in my course schedule. During this mobility, I had the opportunity to communicate with the students of the Department of Economics. I learned that the curriculum of the department includes easy-to-understand lessons, the teachers are friendly and approachable, and the departmental courses are designed to attract the attention of the students. As a result of my contact with students and educators, I had the opportunity to compare the economic conditions of the geography I live in and the geography of Central Europe.

I think that Erasmus+ mobility contributes to academics as it provides the opportunity to compare their own environment with a foreign environment. I would like to thank Istanbul Gelisim University for helping me experience this process and the university administration for supporting us in this direction.

CULTURE-ART

Concert: Munich Chamber Orchestra & Nicolas Altstaedt (02 June)

Nicolas Altstaedt, one of the world's leading cellists, is coming to Turkey once again for the 51st Istanbul Music Festival. Altstaedt will be the conductor of the Munich Chamber Orchestra, one of Europe's distinguished ensembles, at the concert where he will showcase his outstanding talent in his instrument.

Visit: <https://www.iksv.org/> in order not to miss the music festivals.

Restaurant Week

Turkey's first gastronomy festival and highly anticipated every year, Restaurant Week will be held in Istanbul, Izmir and Ankara between June 1 - 25, 2023. During the Restaurant Week, where the theme of "sharing" will come to the forefront with the slogan "There's So Much to Share", Turkey's leading participating restaurants will offer their "sharing" themed menus specially created for the event at more affordable prices. More than 100 restaurants will participate in the events, which will also feature pop-ups, chef workshops and conversations.

Location: Istanbul, Izmir and Ankara

Date: June 1 - 25, 2023

For detailed information and reservation: restoranhaftasi.com

Show: Rhythm of the Dance (June 02-30)

With "Dance Rhythm", Ottoman Palace dances and dances of different regions of Anatolia are presented with a contemporary choreography, blending with oriental dances and rhythm show. This dynamic dance show fascinates the audience under 360-degree visual effects and in a historical atmosphere with magnificent costumes. In addition, the "Dervish Experience" exhibition in the foyer can be visited before the program.

Venue: Hodjapasha Show and Event Center

CULTURE-ART

Palegg

Palegg is a cute place in Kadıköy that can be preferred for lunch and dinner. Although this place, which has a small entrance in the side streets of the windmill, is difficult to notice at first glance, it is famous for its Scandinavian-style delicacies. Especially the "Tavuk Falan" and "Lemonade with Lavender" on the menu are worth trying.

It is also useful to remind; Unfortunately, queues can form in front of Palegg, which has a small number of tables. In addition, the closing time of the venue is earlier than the surrounding venues.

Venue suggested by Res. Assist. Türkan Öykü Büyükçelikok

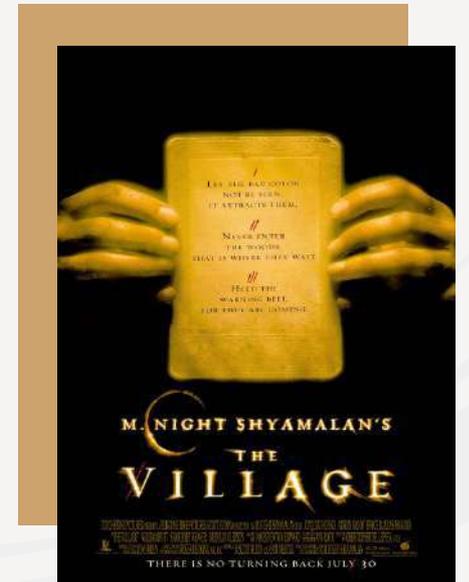

Stevi Stefan Church (Iron Church)

The construction of the church, located on the shore of the Golden Horn in Balat, dates back to 1859. Considered an example of Gothic revival architecture, the church was built entirely of iron and metal. Stevi Stefan Church, which is free to visit, is worth seeing with its stained glass windows and interior design as well as its exterior architecture.

FILM: The Village

Although The Village is touted as a horror movie, it is actually a movie that deals with the themes of being afraid, being intimidated, being ruled by fear and being able to overcome fears.

The film, which questions life and the authority of dogmatic thoughts, deals with the tragic stories of people living in a village isolated from the outside world being frightened by extraordinary beings, but actually being ruled by a handful of people, in the presence of fear.

CULTURE-ART

Special days in May

Hıdırellez (May 5-6)

Hıdırellez is a seasonal holiday in Central Asia, the Middle East, Anatolia and the Balkans. It is celebrated because it is the day when the Prophets Hızır and İlyas meet on earth. The words "Hızır" and "İlyas" were merged to form the word "Hıdırellez". Hıdırellez day, according to the Gregorian calendar, is May 6, according to the Julian calendar, also known as the Rumi calendar, which was used in the past, it is April 23.

Hıdırellez, one of our seasonal holidays, is celebrated effectively in our country. Preparations are made in advance for Hıdırellez in towns and villages, less in big cities. These preparations include cleaning the house, cleaning the clothes, food and drinks. Houses are cleaned thoroughly before the day of Hıdırellez. Because it is thought that Hızır will not visit unclean houses. New clothes and shoes are bought to be worn on the day of Hıdırellez.

Mothers Day (May 14)

It is a special day celebrated at different times all over the world to commemorate and honor mothers. The tradition of Mother's Day begins with the celebration of the annual spring festival, which the Ancient Greeks held in honor of Rhea, the mother of many gods and goddesses in Greek mythology. Ancient Romans also celebrated spring festivals in honor of the mother goddess Cybele 250 years before the birth of Jesus.

BOOK RECOMMENDATIONS

Asst. Prof. Dr. Görsev SÖNMEZ

Department of Translation and Interpreting

Erich Fromm, The Art of Love

The book begins with a wonderful quote by Paracelsus.

"One who knows nothing loves nothing. One who can do nothing understands nothing. A person who understands nothing is worthless. But the one who understands both loves, is sensitive to everything and sees.... The more knowledge there is in something, the greater the love. ... One who thinks that all fruits ripen at the same time as strawberries does not know grapes at all. "

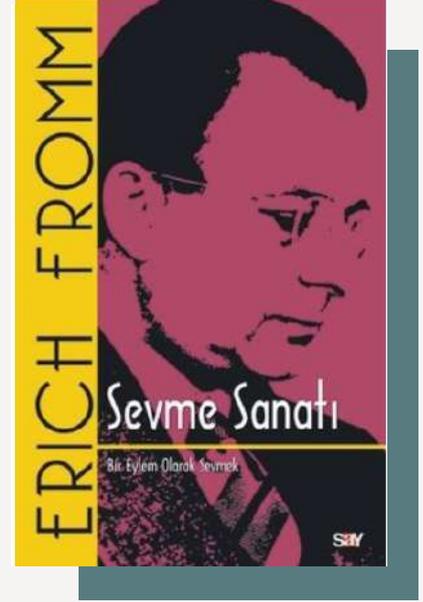

The book consists of 4 chapters that will be read with pleasure with the meaning this quote imposes. In the first chapter, the author discusses what it means to love and whether love is an art. According to him, loving is an art. According to him, love is an important concept and everyone thinks this way. Although everyone knows that love is important, they don't tend to make an effort to understand and learn about it. Very few pay attention to it and search for something about love. There are so many movies, songs, books, etc. about love, but very few people think about it. People are starved for love.

In the second part, the author describes the nature of love. The belief that love will solve the problem of human existence is emphasized. He says that although the underlying element of love is sexuality, the underlying element of love is the emotional state that develops over time. In the third chapter, the author examines love in different ways and describes it by dividing it into sections. He divides it into sections as brotherly love, motherly love, sexual love, self-love and love of God. According to Fromm, to the extent that you love yourself, you love the other person(s). Self-love is not selfishness.

"If I can say to a person 'I love you', I should be able to say 'I love everyone in you, I love the whole world in you, I love myself in you'."

The last section deals with the practice of love. Many people avoid love, which is said to be the most difficult emotion to practice among societies. No matter how much we read and no matter how hard we work, we will always fall short of love and it is not in our hands.

This book will disappoint anyone who wants ready-made knowledge of the art of loving. On the contrary, what is meant to be shown here is that love is not an emotion that can be enjoyed by anyone at random, without reaching a certain maturity. The purpose of the book is to show the reader that unless they develop his whole personality creatively, their efforts to love will fail, and that love cannot be satisfied without the ability to love one's neighbor, true humility, boldness, faith, and discipline.

BOOK RECOMMENDATIONS

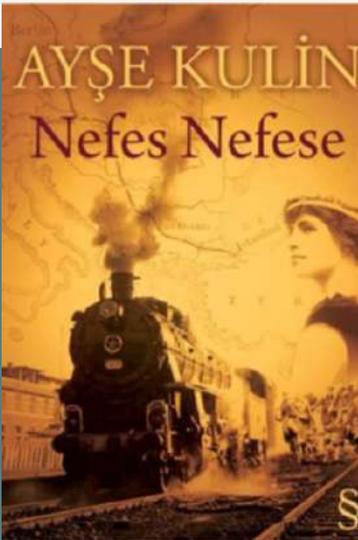

Asst. Prof. Dr. Görsev SÖNMEZ

A Guide for the Disoriented / Kemal Sayar

A Guide for the Disoriented (Kemal Sayar)

At the beginning of the book, the author makes the following statements as a summary of the book. "This book is for those whose heads are split and whose hearts are broken by falling into the world. A guide not to extinguish the light of the heart. Where there is sincerity and care, there is heartbreak, reminding us that we are human. What did you hope for, what did you find, what did you lose? We are hurt by those we love... The world hurts us because we dream for things to be better. Why does one read? You come across a line or a sentence and you say, "This is exactly the feeling that I've been experiencing but I can't name it!" Your loneliness fades away for a moment. You find a kinship with other souls. You multiply and heal. A Guide for the Faint of Heart is a collection of essays written with the desire to heal together. Each essay is a letter to my own soul and to other wounded souls." The good are not alone, let us heal together.

As can be understood from this statement, Kemal Sayar offers a therapeutic book to his readers who have difficulty coping with today's problems.

Breathless Breath / Ayşe Kulin

Known for her mastery in blending historical and contemporary realities with fiction, Ayşe Kulin once again conveys a different side of the world to her readers in this novel, Breathless Breathless, a story set during the Second World War. While dealing with Nazism, one of the cruelest realities of history that swept Europe, and the delicate balance that the Turkish diplomacy of the time took care to maintain, she also tells the story of the love and escape of a Jewish young man who married the daughter of an Ottoman vizier on the front side of this historical plan. Breathless Breath is one of the most important novels written in recent times that sheds light on the inevitable intersection between the history of individuals and the history of humanity, thus justifying its place among the masterpieces of a master writer.

The Story of My Brother / Zülfü Livaneli

It all starts with the murder of a young woman in a quiet fishing village, a murder that leads to the meeting of a retired civil engineer and a young, beautiful and curious journalist girl. Thus begins a story, or rather a story within a story, in which fiction and reality are mixed and the darkest, most nooks and crannies of emotions are penetrated. The doors of a modern Thousand and One Nights are opened. Only this time Scheherazade is a man.

My Brother's Story is a breathtaking novel about love, its complexities and dangers, which invites those who believe that love is the final destination for happiness to think again.

Warrior (Doğan Cüceloğlu)

The author begins his book with Cummings' quote: "In a world that works day and night with all its might to make you no different from the others, to remain yourself means fighting the hardest battle in the world. Once this battle begins, it never ends...". The title of the book, Warrior, refers to a warrior in this sense. Among the characters in the book, the author himself, as in reality, is a well-known lecturer and expert in perception, learning, psychology and communication; Mr. Arif is an unhappy classroom teacher who feels like an idiot, doesn't know what he wants, is lonely and feels lost. After the two characters meet, the topics in the book are conveyed to the reader in a question-and-answer format between the author and Mr. Arif, with Mr. Arif's questions and the author's answers about life, psychology, society, philosophy, communication and human relations.

Don't Punish Me with Rewards / Özgür Bolat

What We Know Wrong About Child Education! Is everything we know about rewards wrong?

- Why does reward demotivate?
- Why can't values be taught with rewards?
- Why does reward negatively affect creativity?
- Is reward a sign of artificial love?
- What dangers await children who grow up with rewards?
- How to raise a happy and successful child?

Dr. Özgür Bolat, an educational scientist, clearly reveals the answers to many of these questions with scientific research and real cases from the last 70 years.

Dr. Özgür Bolat not only explains the invisible hidden harms of rewards, but also offers us a model, practical solutions and applications.

FoAS STUDENT CLUB

PHOENIX CLUB

The Phonix Club (Anka Kulübü) was established in December 2021 under the roof of the Faculty of Applied Sciences, affiliated to the SKS Department. The club has determined its basic vision as representing eternity like phoenixes and guiding and enlightening those who will come after them by ensuring continuity. Club consultancy is carried out by Res. Assist. Rabia Şentürk from the Faculty of Applied Sciences, Department of Aviation Management.

The main objectives of our the Phonix Club are;

- to keep people who have devoted themselves to aviation and who have made great efforts in the past and future live within the university,
- to make students love aviation through activities such as career interviews, conferences, competitions and trips,
- to bring together not only aviation students, but also everyone who is interested in aviation and wants to have an idea about aviation, with experts in aviation.

Some of the important activities carried out by the Phonix Club so far:

- Aviation Innovation Talks 1
- Aviation Innovation Talks 2
- Eskişehir Turkish Aeronautical Association Free Model Aircraft Training
- Profession Introductions 1
- Profession Introductions 2
- Industry Meetings
- 15 May Air Martyrs' Day
- 7 December International Civil Aviation Day
- Amadeus Software in Aviation and Employment Talk
- Hazarfen Aircraft Museum Trip
- Yesilkoy Aviation Museum Trip

Students who want to become a member of the club can apply for club membership from the OBIS system, as well as follow our club's @iguankahavacılık instagram address.

NEWS FROM SECTOR

600 Aircraft Order from Turkish Airlines!

Turkish Airlines announced that negotiations have started for 600 aircraft to be added to its fleet within the scope of the 10-year plan. The statement made by Turkish Airlines to the Public Disclosure Platform (KAP) for the giant order is as follows "Within the scope of the growth targets set out within the framework of the Strategic Plan of our Incorporation covering the years 2023-2033, it has been decided to initiate negotiations with aircraft manufacturers and engine manufacturers for the procurement of a total of 600 aircraft, approximately 200 wide body and 400 narrow body aircraft. It is respectfully announced to the public."

The Wounds of Earthquake Regions Will Be Healed Together with Algida and TEGV Cooperation!

TEGV education trucks named after Firefly and sponsored by Algida, met with children and their families in earthquake regions as part of "Social and Emotional Post-Disaster Activities". Turkey's ice cream maker Algida, in cooperation with the Educational Volunteers Foundation of Turkey (TEGV), is reaching out to children and families in the regions adversely affected by the earthquake disaster with Firefly learning units. The project will contribute to children's emotional development and socialization, while supporting them to receive quality education in many fields such as informatics, technology, mathematics, science, art, reading including English language learning and games. Within the framework of "Social and Emotional Based Disaster Activities", children have the opportunity to practice social-emotional learning content after breathing and movement exercises, opening circle and sharing, play, drama and art works.

THY Revamps Its Catering!

Turkish Airlines continues to maintain its position as the airline with the best catering concept in the world with its menus renewed with new and delicious flavors. The flag carrier, which is the airline flying to the most countries in the world as well as making a name for itself with the quality of service it offers to its guests, continues to offer delicious alternatives to its guests by renewing the catering menus served in business and economy classes on domestic and international flights. With the aim of promoting Turkey, Turkish Airlines includes flavors from both traditional Turkish cuisine and international cuisines in its new catering menus and procures 80% of the products used in its menus from local producers.

50 Tons of Blueberry Produced with Hydroponic Agriculture on the Road!

Land of Berry, which set out from Antalya as Turkey's blueberry producer and grows its products with hydroponic agriculture (soilless agriculture) method, has realized its first harvest. Land of Berry, which grows Ventura, Biloksi and Star varieties of the vitamin and mineral store blueberry fruit, which has a rising value in recent years, with hydroponic agriculture on an 88-acre area in Antalya's Serik region, realized the first harvest of the year. The brand, which plans to harvest over 50 tons in total from the blueberries grown in 88 acres of open field and 4 acres of greenhouse this year in accordance with GLOBAL G.A.P. good agricultural practices and export standards, aims to achieve a yield of over 80 tons next year. Land of Berry, which carries out its production with a production policy that does not harm the environment, humans and animals, also saves natural resources thanks to its efficient usage areas and sensitive tracking systems.
