NEWS

Pay attention to the electromagnetic field: Children are the most affected, it can lead to cancer

OCTOBER 26

2020

High-voltage lines around parks, playgrounds, and even the house we live in, which are indispensable for children, are dangerous. Electronic technology lecturer Nevzat Yağız Tombal, who said that the electromagnetic field formed here triggers many diseases, especially cancer, said, "There are problems such as retardation in brain functions or slowing of some functions. In the near term, it is known to cause perception disorders, anxiety and stress."

Green areas where you can visit as a family, parks where children are not tired of going, your home or the location of your workplace may endanger your health. The crackling sweaters and goose bumps of children while playing in

the park can be the harbinger of some dangers. Istanbul Gelişim University Electronic Technology Instructor Nevzat Yağız Tombal emphasized that these areas are important for the socialization of children and gave advice to parents against dangers. Tombal said: "Static electricity, which is generally caused by the material, can cause this. Another is the high voltage lines unfortunately located in some parks and gardens, very close to settlements. These two factors pose an important danger to our children. There are many researches that places with electromagnetic fields can be harmful to human health. We know that there are bigger problems especially for children."

Economics, Finance and Management Conference held online

OCTOBER 26

2020

The 4th International Conference on Economics, Finance and Management, held online this year due to the global pandemic, ended. It was announced that international participants had the opportunity to evaluate global problems and developments in the fields of economy, finance and business management, and shared their opinions and research at the conference, which was held in cooperation with Istanbul Gelisim University (IGU) and The West of England University of Great Britain.

In the statement made by Istanbul Gelisim University about the conference it is said:

"Gelişim - UWE 4th International Conference on Economics and Finance titled as 'Opportunities and Threats of the 21st Century: Digitalization and Climate Change' also enables international participants to collaborate both in research and business life, thanks to the academic relationships developed between them."

Preschool children take photo with mobile devices

OCTOBER 28

2020

Lect. Ibrahim Tarkan Doğan, who examined the photo recognition and production competencies of 60-72 months old preschool children, shared the results of his research. According to the study, 75 percent of the children stated that they took photos before, 66 percent of the children stated that they took the photos with mobile devices and 63 percent stated that they took better photos with mobile devices.

Stating that only 8 percent of the children use the camera of their families, Lecturer İbrahim Tarkan Doğan from Istanbul Gelisim University said:

"Although 47 percent of the children gave answers with their own reasons for the reason why the photo was taken, only 2 percent stated that the photo was taken to remember. While 75 percent of the children stated that they took photos before, 66 percent of the children stated that they took the photos with mobile devices, and 63 percent stated that they took better photos with mobile devices."

Dr. Aliyev: President Erdogan repeatedly disrupted the games of France

OCTOBER 30

2020

Stating that France is actually trying to mask hatred for Erdogan by promoting Islamophobia, Dr. Bahlul Aliyev said: "President Erdogan repeatedly disrupted the games of France and imposed worldwide role of Turkey in the region; it has created hatred in some western colonialist leaders against his personality."

"MASKING HATRED AGAINST ERDOGAN"

Emphasizing that Charlie Hebdo's targeting of President Recep Tayyip Erdogan is a step to mask hatred against Erdogan over the recent strategic crisis with France, Dr. Aliyev said: "Erdogan repeatedly disrupt the game in the region, imposed Turkey's role worldwide has created hatred in some western colonialist leaders against Erdogan. The fact that they find Erdogan in front of them in every decision they make is increasing this hatred every day. Erdogan was the first to react in the last caricature crisis, and then the leaders of different countries found their courage and expressed their reactions – this increased the attacks against Erdogan's person. The fact that the target of the cartoons is not the leaders of other countries who reacted, but only Erdogan proves this. Some countries led by France are actually trying to mask hatred for Erdoğan by promoting Islamophobia."

THINGS TO KNOW

ABOUT NEW CORONAVIRUS

All necessary measures are taken for the **coronavirus** revealed in Turkey and the World at **Istanbul Gelisim University**. **Things to know about coronavirus are as follows:**

What are the new coronavirus symptoms?

- The most common symptoms are **fever, cough and respiratory distress**.
- In severe cases, **pneumonia, severe respiratory failure, kidney failure and death** may occur
- Incubation period is between **2 and 14 days**.

How is the virus transmitted?

- It can be transmitted by the contact of the droplets caused by **coughing and sneezing** with the contact of the **mouth, nose and eyes** of other individuals in certain environment and by touching the surfaces where the droplets adhere and taking hands **into the mouth, nose or eyes**.

What to do to be protected from the virus?

- When **coughing or sneezing**, the mouth and nose should be covered with a **disposable tissue**, if there is no handkerchief, the mouth should be closed with the **upper sleeve or elbow**, not with the palms.
- **Handshaking and hugging** should be avoided.
- **Mouth, nose and eyes** should not be touched with dirty hands.
- Hands must be washed for **at least 20 seconds** in accordance with the **Handwashing Instructions** found in the toilets. In the absence of water and soap, **alcohol-containing hand antiseptics** should be used. **Cologne of 70-80 degrees** also serve as disinfectants.
- Offices and classrooms must be **ventilated hourly**.
- Places frequently used by many people such as common areas and door handles should be **disinfected every 2 hours**.
- Hands **must be washed** after using **public transportation**.
- Because the virus progresses faster in people with low immune system; **a balanced and healthy diet** is required. Foods **must be washed thoroughly** before consumption.

What to do if there are symptoms?

- If you have come from countries with infections **in the past 14 days**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- If you are **coughing, have a fever and have difficulty at breathing**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- **Always wear your mask** when you are in the same room with **a person who is recommended insulation** at home.

PROTECTION AGAINST VIRUS IS IN OUR HANDS

THE MOUTH AND NOSE SHOULD BE CLOSED WITH PAPER TOWEL DURING COUGHING AND SNEEZE. IF YOU DO NOT HAVE ANY WIPE, THE INSIDE OF THE ELBOW SHOULD BE USED.

CLOSE CONTACT SHOULD AVOID LIKE HANDSHAKE AND HUGGING.

IT SHOULD BE STAYED AWAY FROM CROWDED ENVIRONMENTS.

DO NOT TOUCH THE MOUTH, NOSE AND EYES WITH DIRTY HANDS.

HANDS MUST BE WASHED WITH WATER AND NORMAL SOAP FOR AT LEAST 20 SECONDS.

ALCOHOL CONTENT HAND ANTISEPTICS SHOULD BE USED IN CASE OF THERE IS NO WATER AND SOAP.
