ADMINISTRATIVE

Medine Koçyiğit has started to work as Call Center Operator at the Public Relations and Publicity Department as of 05.02.2021.

UPDATES FROM IGU

General Directorate of Civil Aviation extended the duration of the authorization certificate given to the Flight Operations Management Program within the Istanbul Gelisim Vocational School. Istanbul Gelisim Vocational School, which is authorized by the General Directorate of Civil Aviation to provide training in the field of "Flight Operations Management", will be able to continue its education without slowing down.

IGMYO, which trains qualified aviation students for the sector, firstly fulfilled the requirements of the authorization certificate it received in 2018 and successfully passed the inspections carried out by DGCA in 2020. IGMYO makes a difference in the field of aviation with its experienced lecturers within the Flight Operations Management Program and academicians working actively in the sector. While the educational content of the program is based on the joint execution of theory and practice in the professional sense, it also gives students the ability to take initiative.

Hidayet Yıldız, a lecturer in the Department of Banking and Insurance, has been accepted as an expert in the field of Financial Services. Hidayet Yıldız is included in the 2021 list with the registration number 34/29 within the scope of the Consumer Arbitration Committees Expertise Regulation.

Architecture Profession Redefined Under Changing World Conditions

For the last year, our lives have been the scene of brand new concepts. We are experiencing a great change and transformation in every field, from the way we do business to our living habits. It is very exciting that the architectural profession is being redefined as the whole world is being redefined.

The keyword as always is to adapt. In fact, the essence of life goes through here. Being able to adapt, accepting and internalizing change is getting more attention and importance than ever before. Architectural education, by its very nature, supports concepts such as flexibility, adaptability and sustainability. At this point, it takes architects one step ahead in adapting to the conditions of the digitalizing world. These days,

where we can all meet with the other end of the world without changing locations, continue our business without going to our offices, and learn and experience that this is possible without disrupting our work, are actually full of unique teachings. Architecture is one of the professions that will feed on these teachings and take their place in the transformation. It seems that the old space designs will leave their place to more flexible and minimal solutions after today. Big business groups have already begun to abandon their old business models after the pandemic. In this case, we will see if old office buildings will be needed, but one thing we all know is that nothing will be the same. Change and transformation has begun, digitalization is showing its effect in all areas of our lives. With the help of an application, a program, tens or even hundreds of people can come together and hold our meetings without getting into traffic, it is now possible to attend an event on the other side of the world without leaving our home. While our homes become offices for all of us, architectural conditions arise again. Architecture means designing with more sustainability than ever before.

Today's conditions, where the resources in the world are decreasing and the carbon footprint should be taken into account, the topic of energy efficiency is also top of the list. Designing smart buildings and increasing the number of green buildings is the most important priority of architects. We all have an important responsibility towards the world. The profession of architecture shows us our place in this responsibility by underlining. "Nothing will be the same as before" I said, because the pandemic era has gifted us all very important teachings. These gifts will make very positive contributions to our future life, lifestyle, business models and design and implementation processes as architects. If we consider this challenging but important process that the world is going through with this point of view, we can offer a very important perspective to the next generations and our colleagues who will continue the architectural profession.

I would also like to share here the digital change offered by the process, the architectural activities I follow from all over the world and the common view that my dear colleagues came together. The architectural profession, which is always open to change, will enter a more flexible design process that will adapt to the life conditions after the pandemic with the transformation of our world. As an architect who has devoted himself to the profession for many years and an educator who loves his job, I would like to state that I follow this process with enthusiasm and I will always be happy with the posts. The whole world is our playground, we will continue to take our place in the game with excitement.

Asst. Prof. Dr. Mehmet Rifat Hulusi ÇELEBİ
Head of Department of Architecture

The new obsession of the technology age: Digital Hoarding

FEBRUARY 2

2021

With the age of technology, digital hoarding has also been added to the hoarding disease known as Compulsive Spooling Disease. Psychiatrist Onur Okan Demirci, who said that everything that is kept “maybe just because it works” and not erased on computers or mobile phones is slowly dragging you to digital hoarding, the main reason may be the lack of self-confidence.

Whether valuable or not, goods, waste, packaging, etc. In order to keep up with the times, Compulsive Accumulation Disease, which is defined as the inability to throw things out, entered our lives in order to keep up with the times, and digital hoarding started to be discussed along with the indispensable telephone and computer. Digital hoarding, which has emerged as a new definition because people are not able to delete not only their

physical belongings, but also all kinds of digital data such as photos and conversations from their phones, e-mails or files from computers, is a new definition, Psychiatrist Onur Okan Demirci from Istanbul Gelisim University made evaluations about the situation and results.

Flight Operations Experts will continue to be trained at IGU

FEBRUARY 2

2021

For the “Flight Operations Specialist Training”, the authorization certificate given to the Istanbul Gelisim University Vocational School Flight Operations Management Program by the General Directorate of Civil Aviation (DGCA) has been renewed. Flight Operations Specialists will continue to be trained at IGU.

The “Flight Operations Specialist (Dispatcher) Training” authorization certificate of Istanbul Gelisim University has been renewed. Students who graduate from the relevant department with the certificate of authorization gain the right to take the DGCA exams with the certificate they receive from the university without going to any high-cost flight operations specialist

course for three months.

Schizophrenia increases the probability of death of Covid-19 by 3 times

FEBRUARY 2

2021

'The relationship of psychiatric disorders with death in Covid-19 patients' was investigated. The study conducted in the United States revealed that, after advanced age risk factors, the second largest Covid-19 risk factor is schizophrenia. Psychiatrist Recep Emre Tan, who evaluated the research, said: "Some of the causes of schizophrenia are immune system problems. The research showed that the probability of death from Covid-19 is 3 times higher in patients with schizophrenia." Tan suggested that these people should be in the priority group in the vaccination program.

"The relationship of psychiatric disorders with death in Covid-19 patients" was investigated in America. The response of nearly 7,500 patients to treatment for 45 days was examined and mortality rates were evaluated. Of eligible patients with positive test results, 75 had a history of 1.0 percent schizophrenia spectrum disease, 564 had a history of 7.7 percent mood disorder, and 360 had a history of 4.9 percent anxiety disorder. Those diagnosed with schizophrenia spectrum disorder were associated with the risk of death, while those with mood and anxiety disorders were not associated with the risk of death. The study revealed that the probability of death from Covid-19 is 2.7 times higher in patients with schizophrenia.

The number of cited publications reached 21 thousand 690**FEBRUARY 2****2021**

Evaluating the University Monitoring and Evaluation Report for the year 2019 announced by the Council of Higher Education (YÖK), Prof. Dr. Nail Öztaş said that the number of citations, one of the most important indicators of universities in scientific competition, is one of the most used scientific performance criteria. Öztaş added that “the number of publications cited with 10 percent in Turkey reached 21 thousand 690.”

189 universities in Turkey were evaluated by the Council of Higher Education. Stating that there has been a serious improvement in universities compared to 2018, Istanbul Gelisim University Vice Prof. Dr. Rector Nail Öztaş said: “R&D projects increased by 44 percent compared to the previous year and reached 8,362. The investment budget rate of Istanbul Gelisim University on R&D increased to 47.3%.”

'High School Winter Academy' continues

FEBRUARY 4

2021

The "High School Winter Academy", which brings together high school students interested in science, laboratory studies, arts and sports, continues. The academy aims to guide students' future career choices. Due to the pandemic "High School Winter Academy" organized by Istanbul Gelisim University (IGU) since 2018 is held online.

Stating that the training programs prepared in Turkish and English are followed with interest, Abdülkadir Gayretli, Chairman of IGU Board of Trustees, said: "We have exceeded the borders of our country with our training programs carried out over the Internet. While we were hosting students from several provinces from the east to the west of Turkey at our campus, now we have become followed by the whole world. The number of international students also supports this."

THINGS TO KNOW

ABOUT NEW CORONAVIRUS

All necessary measures are taken for the **coronavirus** revealed in Turkey and the World at **Istanbul Gelisim University**. **Things to know about coronavirus are as follows:**

What are the new coronavirus symptoms?

- The most common symptoms are **fever, cough and respiratory distress**.
- In severe cases, **pneumonia, severe respiratory failure, kidney failure and death** may occur
- Incubation period is between **2 and 14 days**.

How is the virus transmitted?

- It can be transmitted by the contact of the droplets caused by **coughing and sneezing** with the contact of the **mouth, nose and eyes** of other individuals in certain environment and by touching the surfaces where the droplets adhere and taking hands **into the mouth, nose or eyes**.

What to do to be protected from the virus?

- When **coughing or sneezing**, the mouth and nose should be covered with a **disposable tissue**, if there is no handkerchief, the mouth should be closed with the **upper sleeve or elbow**, not with the palms.
- **Handshaking and hugging** should be avoided.
- **Mouth, nose and eyes** should not be touched with dirty hands.
- Hands must be washed for **at least 20 seconds** in accordance with the **Handwashing Instructions** found in the toilets. In the absence of water and soap, **alcohol-containing hand antiseptics** should be used. **Cologne of 70-80 degrees** also serve as disinfectants.
- Offices and classrooms must be **ventilated hourly**.
- Places frequently used by many people such as common areas and door handles should be **disinfected every 2 hours**.
- Hands **must be washed** after using **public transportation**.
- Because the virus progresses faster in people with low immune system; **a balanced and healthy diet** is required. Foods **must be washed thoroughly** before consumption.

What to do if there are symptoms?

- If you have come from countries with infections **in the past 14 days**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- If you are **coughing, have a fever and have difficulty at breathing**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- **Always wear your mask** when you are in the same room with **a person who is recommended insulation** at home.

PROTECTION AGAINST VIRUS IS IN OUR HANDS

THE MOUTH AND NOSE SHOULD BE CLOSED WITH PAPER TOWEL DURING COUGHING AND SNEEZE. IF YOU DO NOT HAVE ANY WIPE, THE INSIDE OF THE ELBOW SHOULD BE USED.
