The current logo of our university is as follows.
We present it to the information of our valued readers.

İSTANBUL
GELİŞİM
UNIVERSITY

**WORLD UNIVERSITIES ARE RANKED
ACCORDING TO THEIR 'POWER OF INFLUENCE':
İSTANBUL GELİŞİM UNIVERSITY RANKED
24TH IN QUALITY EDUCATION!**

Times Higher Education (THE) Impact Ranking 2021, the world university ranking organization, has been announced. In the ranking, Istanbul Gelisim University (IGU) has achieved a great success by taking the 24th place among the universities that provide the highest quality education in the world. In the category of 'Quality Education', Istanbul Gelisim University has achieved a great success by ranking 24th among 1240 universities worldwide. At the same time, the university ranked 1st, leaving 45 universities from Turkey in the ranking. Please [click here](#) for more information.

İSTANBUL GELİŞİM UNIVERSITY IS 16TH IN THE WORLD AND 1ST IN TURKEY IN THE FIELD OF "QUALITY EDUCATION"!

Times Higher Education (THE), the ranking institution of world universities, has been announced the Impact Ranking of 2022. Among the 1180 universities in the world, Istanbul Gelisim University (IGU) increased its success ranking, which was 24 last year, to 16th place in the category of "Quality Education" by increasing 8 steps this year. It continued to maintain its success last year, ranking 1st among Turkish universities.

The success of Istanbul Gelisim University (IGU) was ranked in five different categories in line with the United Nations Sustainable Development Goals, in the list of 1406 universities, which are listed in the 2022 ranking of the UK-based, world's leading higher education rating agency, Times Higher Education (THE). In the Impact Ranking 2022 list, Istanbul Gelisim University (IGU) increased its degree from 24th to 16th among 1180 world universities in the "Quality Education" category, while maintaining its 1st place among Turkish universities.

5 ACHIEVEMENTS FROM 5 DIFFERENT CATEGORIES

In the ranking carried out in line with the categories in 17 fields determined by the United Nations within the scope of the Sustainable Development Goals (SDG), Istanbul Gelisim University is among the universities of Turkey, with its studies in the field of education, innovative projects and its contributions to the society;

- SDG4: Ranked 1st in Turkey in the Quality Education category,
- SDG7: Ranked 4th in Turkey in Accessible and Clean Energy category,
- SDG3: Ranked 12th in Turkey in the category of Healthy and Quality Life,
- SDG6: Ranked 12th in Turkey in the category of Clean Water and Sanitation
- SDG17: Ranked 24th in Turkey in the Partnerships for Purposes category, it proved itself in many areas such as lifelong learning practices, community-oriented learning, personal development opportunities, quality and sustainability of the education provided.

"IN THE INTERNATIONAL RANKING, WE HAVE INCREASED OUR SUCCESS 8 STEPS!"

Abdulkadir Gayretli, Chairman of the Board of Trustees of Istanbul Gelisim University (IGU), who made a statement about the ranking in which the effects of ecological, economic and environmental sustainability practices on society according to the United Nations 17 Sustainable Development Goals are aimed, stated that while İstanbul Gelisim University was among the top 100 universities in the "Quality Education" category in the past years but today it is in the 16th place in the world ranking and he said:

"Istanbul Gelisim University has added a new one to its national and international successes with its growing experience and strong tradition over the years. In the 2022 rating of Times Higher Education (THE), one of the most respected higher education rating institutions in the world, we moved up 8 places from our 24th place in the "Quality Education" category in the world ranking, to 16th this year. This rating, which we received from a reputable organization, makes us proud and motivates us for years to come. We are preparing for the future by being open to continuous development for this purpose. By hosting many national and international large scale projects within our university, we are shaping scientific achievements and the future."

"WE SUPPORT SUSTAINABLE DEVELOPMENT GOALS"

Stating that they continue to work to achieve better every year with the slogan of "Be Open to Development!" Abdulkadir Gayretli emphasized that 65 programs within the university are accredited by international accreditation institutions and that they will continue to provide education at international standards. Stating that they are the first Turkish university to teach sustainability as a compulsory course, Gayretli said, "Under the leadership of Prof. Dr. Erol Özvar ,The President of the Higher Education Institution (YÖK), we want universities to be leading institutions in raising qualified manpower and creating knowledge and technology accumulation in line with Turkey's development goals, and we support sustainable development goals. We have made education and research our mission for the future of the world and humanity. We continue to work by giving importance to sustainability in order to leave a better world to future generations and to achieve lasting success."

Times Higher Education (THE), Impact Ranking (Impact Ranking) 2022 list can be found [here](#).

822nd Among 4,126 World Universities

SCIMAGO
INSTITUTIONS
RANKINGS

World university ranking organization SCIMAGO 2021 results announced. In the evaluation, Istanbul Gelişim University was ranked 822th among 4 thousand 126 universities in the world.

The SCIMAGO 2021 world university ranking list, which is made by evaluating the research and innovation activities of world universities between 2015-2019 and web indicators for 2020, has been announced.

“21st in Economics, Econometrics and Finance”

SCIMAGO, the Spanish-based international higher education rating agency, measured the research performance, innovation output and web visibility of world universities. According to its research and innovation studies in the fields of Economics, Econometrics and Finance, Istanbul Gelişim University ranked 21st among the universities in Turkey, 7th according to its research and innovation studies in the field of environmental sciences, and 30th in Turkey according to its research and innovation studies in the field of mathematics. In the field of environmental sciences, Istanbul Gelişim University also managed to be the 300th among OECD country universities and 37th among Middle East universities.

COMMENTARY ON SCIENCE FICTION

If planned thinking is future-oriented, and it is also the science of the future, this phenomenon is "science fiction". However, the logic of application when science fiction becomes science can be either positive or negative. It would not be wrong to say that the scientist who carried out the development (invention, discovery, etc.) in the said science in terms of practical value caused this situation, and that those living on the basis of that society avoid responsibility. In other words, there are letters in an alphabet, but the person who wants can produce words from the letters and sentences from these words. Of course, this situation has an approach to being included in some values such as censorship in the real sense. Although the same approach should be included in approaches that can be called international censorship (such as not using chemical weapons in wars) on the basis of the application of science, it can be active in different ways such as secret, hidden, ignoring, etc. However, "real or supposed to be science fiction" means that the subject, which will be the science of the future, should be interpreted positively in every sense from now on. This situation also provides positive returns on the basis of thought. Thus, just as there are associations and foundations on certain subjects, a phenomenon that radiates positive energy will have occurred on the basis of "science fiction" (at least one subject).

This concept; It will be only one of the steps taken far beyond the word "globalization", which is used very frequently today. Research and Development Centers are at the forefront of the organizations that strive, make effort, and make sacrifices for the transformation of science fiction into science. However, it can be said that the studies carried out by these centers in question are science fiction to the extent that they are more advanced on the basis of the subject discussed. For example; Although it is science to increase the current gain coefficient of a transistor, it is a matter of science fiction for the moment. However, using a transistor for much more advanced scientific applications (for example, they are made of such elements that each of them can increase pico-ampere currents to the level of kiloamperes and send it between galaxies in the universe without using capacitors, coils, antennas, etc.) is more meaningful science fiction than today's science and technology.

Science; It can be said that it is the expression of the realities of the creatures of that time in logical, meaningful and nature-appropriate ways. Science fiction references this approach. However, the time itself is formed by thought-based approaches that are open to discussion, with or without a transition between its past and future. So much so that, while the subject of science fiction, which is considered depending on the evaluation, overlaps with the science of the future in a large percentage, it can be called the opposite, incompatible or even absurd.

Making science and science fiction a philosophy of life shows positive meanings spreading in all directions in the form of a sphere whose center is the relevant person and whose radius is constantly increasing. It does not make sense to associate the spread of all fields with one living thing. However, if many values such as science, science fiction, fine arts and sports are associated with a living thing within certain percentages, from each of them, that creature must at least be the leader of the society in which it lives. The fact that the said percentage is high on the basis of a large number of living things can be associated with that society being the leading country in the related celestial body. It is also known from history that there have been many people who saw the future. At the beginning of these are the people called the Prophets and then the leader.

Even though these people could not be understood in the time period they lived, they lived together with "science fiction". They may not have been referred to as such in the later period of time. Like the open-ended question, the "open-ended" scientific approach may have a different definition of science fiction in another sense. Although many phrases such as "polyphony", "what is wrong with one hand, two hands have a voice", although they were used for different applications at first, they completely overlap with "science fiction". If at least one formula of any science is understood and studied in detail, a large number of works can be created to include many pages. When a generalization is made, the physics and chemistry formulas from the sciences stand out more than the others according to the person who will deal with them. The continuous development of science and technology and its renewal with new values and meanings is the clearest and most definitive proof that "science fiction", that is, a different interpretation of science, exists from the very beginning. Without science fiction, there would be no talk of the development or progress of science and technology.

internet AS A NEW COMMUNICATION TECHNOLOGY

Lect. Simge YILMAZ

Audio-Visual Techniques and Media Production Program

There is a process that leads to the gradual progress of developments in communication technologies and the opening of a new era in communication technologies with the following internet. Especially in recent years, with the increase in the influence of the internet, the area that politicians follow carefully has been electronic media. Because the internet is a virtual public space where users with a high participation rate and who have the same thoughts or the power to influence each other, can be used as a tool in both social and political moves. In this direction, Masuda states that new communication technologies have created a transformation in the political field, political communication has risen to an active position and the concept of electronic democracy has emerged. It is stated that technology has thrown the concept of representative democracy into the background and replaced it with direct democracy. Moreover, direct democracy is institutionalized and thus, ways of voting in electronic environments are opened.

Search

The concept of electronic democracy continues to be talked about thanks to the features of the internet that provide fast interaction, and many participants regardless of time and place. In particular, the possibility of political participation being higher than a face-to-face democracy is seen as a positive step. With the power of the Internet, it allows the masses to access information easily and comfortably. This brings an electronic democracy participation to the fore instead of traditional democracy participation. In this concept of electronic democracy, it is thought that political actors will communicate more carefully and effectively, come together with their voters constantly and listen to their problems, reach voters in every corner of the country easily and at low cost, and thanks to all these, there will be a positive relationship between politicians and their voters.

Virtual communities and digital surveillance are among the notable concepts that come with technological developments. Rheingold states that virtual communities are communities that do not have the opportunity to communicate face-to-face, but seek an environment to share their feelings, thoughts and ideas, and therefore use electronic media and the internet. Healy, on the other hand, defines it as a space where users who are independent of time and space and who are not together for many different reasons, organize socially and virtually under the same roof with users like themselves. As stated by Rheingold and Healy, it is seen that virtual communities parallel the public sphere and even characterize the virtual public spaces. In this direction, it is possible to foresee that many new concepts will emerge with the advancement of technology and that previous concepts will come together to create current and common meanings.

THE EFFECT OF MINORITY ON CRIMINAL RESPONSIBILITY

Lect. Onur KORU
Justice Program

The existence of criminal responsibilities is necessary for the acceptance that people have committed the crimes in the penal laws and that they should face penalties. According to Article 31 of the Turkish Penal Code, titled as minor, children who did not reach the age of twelve at the time of the crime do not have criminal responsibility. Therefore, if a child commits a crime before twelve years from his/her birth, it is not possible to prosecute the child. However, according to the continuation provision of the same article, security measures may be applied to that child.

The concept of child, according to the definition in Article 6 of the Turkish Penal Code, describes a person who has not yet completed the age of eighteen. Therefore, it is possible for children between the ages of twelve and eighteen to be punished if they commit a crime. This penalty can be in the form of a judicial fine or imprisonment depending on the gravity of the crime.

The idiom child is divided into different categories according to age ranges. In the above-mentioned provision, Turkish Penal Code article 31/1 does not envisage any criminal responsibility for children under the age of twelve, while article 31/2 for children between the ages of twelve and fifteen; Article 31/3, on the other hand, stipulates the criminal responsibility of the child between the ages of fifteen and eighteen.

The existence of the criminal responsibility of a child who has completed the age of twelve but not completed the age of fifteen depends on his ability to comprehend the legal meaning and result of the act at the time he/she commits the crime. If he/she has this ability, he/she has criminal responsibility, if he/she does not, he/she will be considered just like a child who has not completed the age of twelve. A child who has completed the age of fifteen but has not completed the age of eighteen has criminal responsibility in any case. However, the penalty to be imposed will still be applied by reducing due to minor age.

CLUBS

TALK!

ENGINE
CLUB

Engine Club is a club established within the body of Istanbul Gelisim University, Department of Health, Culture and Sports (HCS). Club consultancy is carried out by Lecturer Yasemen KARAMAN, Head of Engine Program of Istanbul Gelisim Vocational School. Our club is a club where works are carried out to bring original ideas to life, its members can improve themselves technically or administratively, and its doors are open to everyone, not just engine students. The aim of our club is to cooperate with relevant institutions, to plan and organize joint studies, to participate in conferences, congresses and workshops, to organize technical trips, to participate in sectoral fairs, to create training workshops, to strengthen the industrial and social relations of students and academicians, in addition to the social and cultural development of our students.

Our club's fields of activity are;

- Collaborating with relevant organizations,
- Attending conferences, congresses and workshops,
- Organizing technical trips,
- Following academic and professional fairs,
- Strengthening sectoral ties with students and academics,
- Organizing interviews with various speakers.

OUR EVENTS

A "sustainable furniture" workshop was held with the first and second year students of the Interior Design Program between 18-22 April 2022. The workshop continued for 5 days on the 17th floor of the Gelişim Tower.

On the first day of the workshop, where the concept of sustainability was discussed, the department lecturers informed the students by making a presentation. Lect. Hülya ALGUR MARŞOĞLU "Concept of Sustainability", "Sustainable Architecture and Ecovillage Analysis", Assist. Prof.

Dr. Nuran ÖZTÜRK "Sustainable Design and Design Examples", Lect. Gözde İleri "City Furniture", Lect. Rabia Sevda DEMİRKOL, "Sustainable Urban Furniture" and Lect. Selin Rüya ÇAKIR "Sustainable Materials" made presentations on the subject. After the presentation, the students started their work by dividing into groups. All teams continued to work on their projects and exchanged ideas and information with each other and with the program teachers during the day. Working in an efficient and pleasant environment for five days, the students had the opportunity to experience the design process. After the manufacturing process of the designs made in the workshop, they were exhibited at Gelişim University Tower Art Gallery on May 16, 2022.

The interview about the Savings on Health which is the first session of Istanbul Gelisim University Vocational School (IGVS) Public Relations and Advertisement Program's Savings Seminars, took place with Dr. Burcu Yüce Akalın's leadership on April 25, 2022 at the IGU Block G Aziz Sancar Conference Hall. In the presentation, the students had the opportunity to learn about the use of excessive drugs and the drawbacks of drug waste on the environment. We would like to thank Dr. Burcu Yüce Akalın and all the participants.

Organized by the Human Resources and Career Club, the "Flormar Turkey Company Trip" event was held with the participation of Hülya ATEŞOĞLU and Human Resources Management program students.

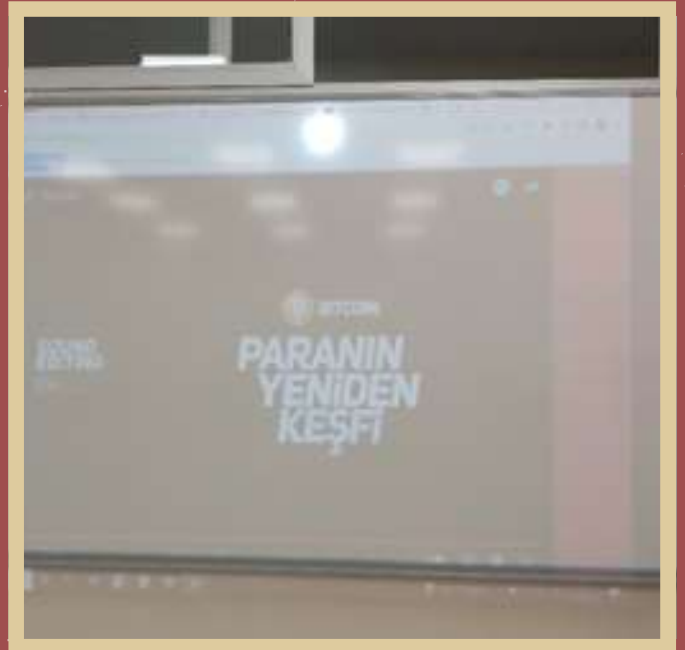

On the day where the Flormar Factory Human Resources team came together with the students of Gelişim University Human Resources Management program, a field visit was made in the production area, after the presentations about the company presentation and then the HR processes and structure. During the site visit accompanied by the Factory Manager, the production processes in each production area were closely monitored and all stages were explained in detail.

During the visit, which was completed with effective questions, it was a productive day in which information about both the factory's HR structure and the general company's HR structure were shared.

The event ended with a plaque presentation and a photo shoot.

On 25.04.2022, a documentary on "BITCOIN", one of the crypto currencies, was shown to the students of Istanbul Gelişim University, Vocational School, Finance, Banking and Insurance Department, under the leadership of the Banking and Insurance program head Assist. Prof. Dr. Duygu ÇELİK. After the screening of the Bitcoin documentary, the students were divided into 3 groups. On the one hand, there was the group that advocates Bitcoin, which is one of the crypto currencies, and on the other, the group that defends traditional currencies such as Turkish Lira and Dollar. The last group listened to the parties as the referee. The parties, who defended their own views, listened to the decision and opinions of the referee group at the end of the event, and the debate was ended.

Organized by Istanbul Gelişim University, Gelişim Vocational School Human Resources and Career Club, the "What is Expected of You in the Changing Business World" event was held.

In the event held online; Flormar Turkey Global HR Director Beste ŞİRİN shared many information and insights on the reflections of the changing dynamics of the business world in the field of human resources.

Beste ŞİRİN listed the Human Resources trend topics for 2022 as follows:

1. Supporting innovations and collaboration
2. Human Resources as a Pioneer in Transformation
What could be the changes?
 - Changes in company structure
 - Adaptation to rapid changes in the technologies used
 - Adaptation to a new working model (Completely remote, hybrid or working models that they can create according to their own company dynamics)
 - Adaptation of values or organizational culture to change
 - Compliance with digitalization in all areas
 - Moving towards an analytics-oriented business, determining strategies based on data, data-driven organization

The event ended after the questions of our students were answered.

3. Biggest mistake: Being indifferent to technology

- To be able to understand important algorithms and data. For example recruitment, employee engagement, feedback data etc.
- To be able to choose the best solutions and software from the offers in order to establish the right system for your company.
- Consciously collaborating with solution partners during the customization and implementation of new systems for HR.

4. Changing the Turnover approach

Boomerangs. Boomerang refers to employees who return to the company they left after a few years. Boomerangs can add different values to the company they return to with the different competencies they have gained in the company they go to. This is one of the reasons why companies are currently re-evaluating their approach to quitting. You can bid farewell to your employees who quit their job by saying 'see you soon' instead of saying 'goodbye'. In addition, the competencies that HR professionals should have are listed as follows; Creativity, Decision Making, Service Orientation, Flexible Thinking, Adaptation, Agility, Negotiation Skills, Emotional Intelligence, Analysis Ability, Complex Problem Solving.

The second session of the Savings Seminars took place

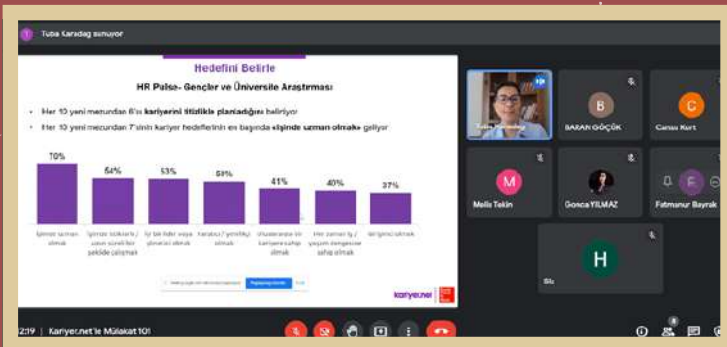

The interview about the Savings at Home which is the second session of Istanbul Gelişim University Vocational School (IGVS) Public Relations and Advertisement Program's Savings Seminars, took place with video artist and outdoor life specialist Gürkan Yıldırım's leadership on May 16 2022, 12 AM at the IGU Block G Aziz Sançar Conference Hall.

Thanks all the participants including Mr. Yıldırım for the talk.

IGVS, Fashion Design Program made an introductory visit to Zeytinburnu IDMIIB Vocational and Technical Anatolian High School and TOKİ Ali Duran Vocational and Technical Anatolian High School on 20 May and 23 May. At the end of the presentation, a souvenir photo was taken with the teachers of the Fashion Design Technology Field.

Organized by Istanbul Gelişim University, Gelişim Vocational School Human Resources and Career Club, the "Interview 101 with Kariyer.net" event was held. In the online event; Kariyer.net Career Counselor Tuba KARADAĞ İYİOKUR provided basic information about the job search process, interview preparation process, and effective CV preparation. The event ended after the questions of our students were answered.

NEWS FROM IGVS

IGVS, Graphic Design Program Lect. Mehmet Ögüt's solo exhibition

"Fire Has No Shadow" brings together fire paintings made by the artist with the technique he has developed for many years, with his new period works. The artist uses natural elements such as stone, water, fire, as well as polaroid photographic paper, mechanical movement and the digital surface of the video to deepen the same questions. His thought passes tangentially to the jugular vein of art theory through axes such as the limitations of subjectivity and possibilities of coincidence in image production processes, and the relationship of reproduction techniques with truth. He sees the issues of sign, image and representation as the keystones of the sensory constructs that regulate the relationship of man with the world, and explores the possibilities of displacing them. Ögüt sets up the playground between similarity and dissimilarity, light and shadow, coincidence and necessity.

The source of the research, which covers all of Mehmet Ögüt's production and also uses digital forms of expression, is the paper works he paints, scrapes and sculpts with sparks and flames. Thinking and acting together with fire, which is the cornerstone of what is called culture, gave Ögüt's art an anthropological context. His work draws on a wide range of fields, from cave paintings to the founding myths of western painting history, from chemical processes to forms of social organization. The sentence he chose as the title invites us to watch the hidden continuity of man's apprenticeship to fire and his battle with his shadow, from the moment "human hand drew the first bison in the first cave" to the present.

Book Chapter by Lect. Zeynep Özcan!

Lect. Zeynep Özcan's work titled "Social Media Users as Country Image Ambassadors in the Age of Digital Diplomacy" was published in the book "Interdisciplinary Image Studies".

"Interdisciplinary Image Studies", edited by Assist. Prof. Sezgin Savaş, Head of the New Media Department of the Faculty of Economics, Administrative and Social Sciences of Istanbul Gelişim University, has been published. Lect. Zeynep Özcan's work was also included in the book. In her study titled "Social Media Users as Country Image Ambassadors in the Age of Digital Diplomacy", Özcan emphasized that diplomacy activities from the past to the present have undergone a transformation in today's digital world, and that social media users now assume the role of diplomats in diplomacy activities.

IGVS, Air Logistics Program Lecturer Atilla AYDIN's article titled "Analysis of Macroeconomic Factors Affecting Fatal Occupational Accidents in European Countries by Cross Section Method" was published in Karaelmas Occupational Health and Safety Journal. [Click for access.](#)

The article titled "A Study on the Effects of Organic Food Consumption on the Selection of Accommodation Facility" by Lect. Senay OTO, IGVS, Tourist Guidance Program, was published in the Journal of Tourism and Gastronomy Studies. [Click for access.](#)

The exhibition themed “Sustainable Design” organized by IGVS, Design Department was opened at Gelişim Art Gallery.

The exhibition, which consists of student works from IGVS, Department of Design Programs (Graphic Design, Interior Design, Fashion Design and Computer Aided Design and Animation) and was jointly organized within the framework of a single theme (Sustainable Design), was opened. The opening ceremony of the exhibition, which included more than 100 works, at the Gelişim Art Gallery on 16.05.2022 at 13:00 attracted great attention. İstanbul University-Cerrahpaşa Secretary General Prof. Dr. Erdoğan KÖSE Dean of İstanbul Gelisim University Fine Arts Faculty Prof. Dr. Şükran Güzin ILICAK AYDINALP academics, artists and students attended the opening ceremony of the exhibition, which was organized by Interior Design Program Assist. Prof. Dr. Nuran ÖZTÜRK and curated by Design department head Assist. Prof. Dr. Mustafa GÜNAY. Speaking at the opening ceremony of the exhibition, the curator of the exhibition, Head of Design Department, Assist. Prof. Dr. Mustafa GÜNAY; He said that the programs within the design department organize exhibitions consisting of in-class practice studies independently of each other, and that for the first time, an exhibition with the theme of "Sustainable Design" was organized by using recyclable and sustainable materials with a common concept within the framework of a single theme of all programs within the department. GÜNAY stated that they want to make this exhibition concept traditional with a different theme and concept every year in the following periods and thanked Assist. Prof. Dr. Nuran ÖZTÜRK, the organizer of the exhibition, Lect. R. Sevda DEMİRKOL, Head of the Interior Design Program, Lect. Esra OBUT, Head of the Fashion Design Program, Lect. Muhammet YÜKSEL, Head of the Computer Aided Design and Animation Program, and all academics and students of the department who contributed to the exhibition.

The exhibition, which has been opened, will be open to art lovers at Gelişim Art Gallery until 20.05.2022 at 16:00.

The 3rd meeting of the EU-RUDISNET project, of which Istanbul Gelişim University is a partner, was held in Lanciano, Italy, between May 4-5. Within the scope of the project, it is aimed to improve the social lives of people with disabilities living in rural areas and to develop their leadership skills. At the May meeting held in Italy, discussions and workshops were held on the digital infrastructure and training curriculum, where the trainings will be published.

The international meeting, attended by Melike ÇETİN, Research Support Coordinatorship Manager of Istanbul Gelişim University and Lect. Esat DAŞDEMİR, our Deputy Director of Istanbul Gelişim Vocational School, was attended by COCEMFE Sevilla, The Ländliche Erwachsenenbildung Thüringen eV, Consorzio SGS, Baltic Education Technology Institute and OZARA d.o.o.o. with representatives of institutions. For more information about the project, in which Turkey, Germany, Italy, Lithuania, Slovenia and Spain are among the participants, you can [click](#) to visit the website.

AGENDA OF PERSONNEL

The Academic Member Dr. Burcu DEMİR was re-appointed as the Head of the Program as of April 27, 2022 to the Foreign Trade Program of the Gelişim Vocational School of our university.

The Lecturer Ahenk Çiçek SÜZEN was re-appointed as the Head of the Program as of April 27, 2022 to the Justice Program of the Gelişim Vocational School of our university.

PROTECTION AGAINST VIRUS IS IN OUR HANDS

THE MOUTH AND NOSE SHOULD BE CLOSED WITH PAPER TOWEL DURING COUGHING AND SNEEZE. IF YOU DO NOT HAVE ANY WIPE, THE INSIDE OF THE ELBOW SHOULD BE USED.

CLOSE CONTACT SHOULD AVOID LIKE HANDSHAKE AND HUGGING.

IT SHOULD BE STAYED AWAY FROM CROWDED ENVIRONMENTS.

DO NOT TOUCH THE MOUTH, NOSE AND EYES WITH DIRTY HANDS.

HANDS MUST BE WASHED WITH WATER AND NORMAL SOAP FOR AT LEAST 20 SECONDS.

ALCOHOL CONTENT HAND ANTISEPTICS SHOULD BE USED IN CASE OF THERE IS NO WATER AND SOAP.

THINGS TO KNOW

ABOUT NEW CORONAVIRUS

All necessary measures are taken for the **coronavirus** revealed in Turkey and the World at **Istanbul Gelisim University**. **Things to know about coronavirus are as follows:**

What are the new coronavirus symptoms?

- The most common symptoms are **fever, cough and respiratory distress**.
- In severe cases, **pneumonia, severe respiratory failure, kidney failure and death** may occur
- Incubation period is between **2 and 14 days**.

How is the virus transmitted?

- It can be transmitted by the contact of the droplets caused by **coughing and sneezing** with the contact of the **mouth, nose and eyes** of other individuals in certain environment and by touching the surfaces where the droplets adhere and taking hands **into the mouth, nose or eyes**.

What to do to be protected from the virus?

- When **coughing or sneezing**, the mouth and nose should be covered with a **disposable tissue**, if there is no handkerchief, the mouth should be closed with the **upper sleeve or elbow**, not with the palms.
- **Handshaking and hugging** should be avoided.
- **Mouth, nose and eyes** should not be touched with dirty hands.
- Hands must be washed for **at least 20 seconds** in accordance with the **Handwashing Instructions** found in the toilets. In the absence of water and soap, **alcohol-containing hand antiseptics** should be used. **Cologne of 70-80 degrees** also serve as disinfectants.
- Offices and classrooms must be **ventilated hourly**.
- Places frequently used by many people such as common areas and door handles should be **disinfected every 2 hours**.
- Hands **must be washed** after using **public transportation**.
- Because the virus progresses faster in people with low immune system; **a balanced and healthy diet** is required. Foods **must be washed thoroughly** before consumption.

What to do if there are symptoms?

- If you have come from countries with infections **in the past 14 days**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- If you are **coughing, have a fever and have difficulty at breathing**, apply to the **nearest healthcare facility** by wearing a **surgical mask**.
- **Always wear your mask** when you are in the same room with **a person who is recommended insulation** at home.
