2023

Volume 3 / Issue 6

myo.gelisim.edu.tr

Dear Young People,

Istanbul Gelisim Vocational School, which started its education life in 2008, started to publish a monthly E-Bulletin as of 2021. We are very happy to bring you the June issue of our e-bulletin and to share with you the developments in our Vocational School. I believe you will enjoy reading our bulletin and I present my greetings and respect with the hope of meeting you in a new issue.

You can follow all the developments in our Vocational School on our social media channels.

ISTANBUL GELISIM UNIVERSITY IS 16TH IN THE WORLD AND 1ST IN TURKEY IN THE FIELD OF "QUALITY EDUCATION"!

Times Higher Education (THE), the ranking institution of world universities, has been announced the Impact Ranking of 2022. Among the 1180 universities in the world, Istanbul Gelisim University (IGU) increased its success ranking, which was 24 last year, to 16th place in the category of "Quality Education" by increasing 8 steps this year. It continued to maintain its success last year, ranking 1st among Turkish universities.

The success of Istanbul Gelisim University (IGU) was ranked in five different categories in line with the United Nations Sustainable Development Goals, in the list of 1406 universities, which are listed in the 2022 ranking of the UK-based, world's leading higher education rating agency, Times Higher Education (THE). In the Impact Ranking 2022 list, Istanbul Gelisim University (IGU) increased its degree from 24th to 16th among 1180 world universities in the "Quality Education" category, while maintaining its 1st place among Turkish universities.

5 ACHIEVEMENTS FROM 5 DIFFERENT CATEGORIES

In the ranking carried out in line with the categories in 17 fields determined by the United Nations within the scope of the Sustainable Development Goals (SDG), Istanbul Gelisim University is among the universities of Turkey, with its studies in the field of education, innovative projects and its contributions to the society;

- SDG4: Ranked 1st in Turkey in the Quality Education category,
- SDG7: Ranked 4th in Turkey in Accessible and Clean Energy category,
- SDG3: Ranked 12th in Turkey in the category of Healthy and Quality Life,
- SDG6: Ranked 12th in Turkey in the category of Clean Water and Sanitation
- SDG17: Ranked 24th in Turkey in the Partnerships for Purposes category, it proved itself in many areas such as lifelong learning practices, community-oriented learning, personal development opportunities, quality and sustainability of the education provided.

"IN THE INTERNATIONAL RANKING, WE HAVE INCREASED OUR SUCCESS 8 STEPS!"

Abdulkadir Gayretli, Chairman of the Board of Trustees of Istanbul Gelisim University (IGU), who made a statement about the ranking in which the effects of ecological, economic and environmental sustainability practices on society according to the United Nations 17 Sustainable Development Goals are aimed, stated that while Istanbul Gelisim University was among the top 100 universities in the "Quality Education" category in the past years but today it is in the 16th place in the world ranking and he said:

"Istanbul Gelisim University has added a new one to its national and international successes with its growing experience and strong tradition over the years. In the 2022 rating of Times Higher Education (THE), one of the most respected higher education rating institutions in the world, we moved up 8 places from our 24th place in the "Quality Education" category in the world ranking, to 16th this year. This rating, which we received from a reputable organization, makes us proud and motivates us for years to come. We are preparing for the future by being open to continuous development for this purpose. By hosting many national and international large scale projects within our university, we are shaping scientific achievements and the future."

"WE SUPPORT SUSTAINABLE DEVELOPMENT GOALS"

Stating that they continue to work to achieve better every year with the slogan of "Be Open to Development!" Abdulkadir Gayretli emphasized that 65 programs within the university are accredited by international accreditation institutions and that they will continue to provide education at international standards. Stating that they are the first Turkish university to teach sustainability as a compulsory course, Gayretli said, "Under the leadership of Prof. Dr. Erol Özvar, The President of the Higher Education Institution (YÖK), we want universities to be leading institutions in raising qualified manpower and creating knowledge and technology accumulation in line with Turkey's development goals, and we support sustainable development goals. We have made education and research our mission for the future of the world and humanity. We continue to work by giving importance to sustainability in order to leave a better world to future generations and to achieve lasting success."

SCImago University Rankings 2023 Results

SCIMAGO
INSTITUTIONS
RANKINGS

SCImago University Rankings has published its 2023 report, which ranks the research, innovation and social impacts of world universities according to percentiles. SCImago University Rankings is a ranking system that measures the social and scientific impact and innovation of universities around the world.

SCImago University Rankings aims to give a general idea about universities by measuring their performance in terms of research, innovation and social impact. The report published after the research can help students, academicians, researchers and other interested parties evaluate universities.

For students, this ranking helps them learn about the quality, effectiveness and prestige of a university in international education. For academic staff and researchers, this ranking provides information on the research activities and effects of universities in different disciplines.

The research performance of SCImago Turkey University Ranking of Istanbul Gelisim University, where multidisciplinary studies are intense, draws attention. According to the evaluation of SCOPUS research output data; Istanbul Gelisim University ranked 2nd in Law, 5th in Civil Engineering, 7th in Industrial Engineering, 32nd in Psychology, 9th in Engineering, 3rd in Environmental Science and 7th in Business Administration among the universities in Turkey.

SCImago University Ranking is very significant for measuring and evaluating the performance of universities, particularly in developing countries. This ranking increases the international recognition of universities in these countries. This ranking offers a more comprehensive perspective when measuring the performance of universities, focusing not only on research impact but also on social impact and sustainability.

SCImago Institutions Rankings

Area	World	Middle East	OECD	Turkey
Environmental Science	630	20	352	3
Business, Management and Accounting	1096	45	759	7
Engineering	1363	45	901	9
Civil and Structural Engineering	575	22	358	5
Industrial and Manufacturing Engineering	928	41	541	7
Economics, Econometrics and Finance	1592	97	979	26
Energy	1967	146	1117	27
Computer Science	2489	164	1516	29
Social Sciences				
Law	774	22	623	2
Sociology and Political Science	1355	42	1044	12
Geography, Planning and Development	1424	81	908	16

When the data of Istanbul Gelisim University in the Evolution of the Institute are analyzed, it is seen that the investment made by the university in scientific research has increased in recent years and the quality of its scientific output has increased as well. This is very crucial in terms of increasing the academic impact and social benefit of the university. Moreover, the increase in innovation capacity and the increase in interaction with the society are among the other factors that demonstrate the success of the university.

ACADEMICIANS FROM IGU ARE ON THE "BEST SCIENTISTS" LIST OF THE WORLD AND COUNTRIES!

Research.com, one of the world's leading research and academia portals, has announced the list of the "Best Scientists" of the world and countries. Istanbul Gelisim University academics were shown among the best scientists in Turkey and the world with their degrees in "Engineering and Technology", "Economy and Finance" and "Neuroscience".

Research.com, one of the world's most significant online academic portals for scientists, has announced its "Best Scientists" list. In the list, which is prepared on the basis of studies created by scientists in their own fields, the criteria of the list are created by taking into consideration the awards received by the researchers, academic publications and the number of citations, as well as based on the D-Index data. According to the ranking, 3 academicians of Istanbul Gelisim University, which progressed with the vision of "Research University", were included in the "Best Scientists" list.

Great success in the fields of "Engineering and Technology", "Economics and Finance" and "Neuroscience"!

Istanbul Gelisim University, which is modern, developing, producing and advancing with an understanding of quality education, stands out with its science, technology and R&D studies. According to the list created on the basis of the D-index created for the purpose of measuring, evaluating and monitoring the performance of scientists in terms of scientific productivity. 3 academicians from Istanbul Gelisim University were included in the list of "Best Scientists" with their successful work.

Istanbul Gelisim University Rector Prof. Dr. Bahri Şahin ranked 17th among 47 scientists from Turkey and 4020th in the world in the field of Engineering and Technology.

Prof. Dr. Kemal Sıtkı Türker from IGU Faculty of Dentistry achieved an important success by being 4th among 6 scientists from Turkey and 5870th in the world.

ARE ON THE LIST OF THE
WORLD'S AND COUNTRIES' 'BEST SCIENTISTS'!**

SCIENTIST	SCIENCE FIELD	NUMBER OF SCIENTIST FROM TÜRKİYE	TÜRKİYE RANKING	WORLD RANKING
PROF. DR. BAHRI ŞAHİN	ENGINEERING AND TECHNOLOGY	47	17	4020
PROF. DR. KEMAL SİTİ TÜRKER	ECONOMICS AND FINANCE	6	4	5870
DR. OĞUL ÜYESİ FESTUS VICTOR BERLİN	NEUROSCIENCE	1	1	1183

Asst. Prof. Dr. Festus Victor from the Faculty of Economics, Administrative and Social Sciences of IGU was the only scientist from Turkey to be ranked in the field of Economics and Finance, and he was ranked 1183 in the world.

"I am confident that Istanbul Gelisim University, which continues to progress with the vision of Research University, will achieve greater success"

IGU Rector Prof. Dr. Bahri Şahin made a statement about the success achieved in the ranking, in which scientists are evaluated only for the studies they have conducted in their fields. "I would like to congratulate our esteemed academicians who successfully represent our university and our country in the "Best Scientists" list published by Research.com. We are proud of this result through academic publications, awards and citations made on a global scale. I am confident that Istanbul Gelisim University, which continues to progress with the vision of Research University, will achieve greater success in the future as well."

IGU's Great Success in TUBITAK 2023 Competency Map Report

Istanbul Gelisim University took place in 17 of 21 main research areas and 62 of 132 sub-research areas in the TUBITAK 2023 competency map. IGU has come to the fore among Turkish universities in terms of both quality and research intensity in 9 of the main research areas and 26 of the sub-research areas.

The fields in which our university stands out both in terms of research quality and research intensity. Its ranking among Turkish universities are given in the table below.

We thank all academic staff who contributed.

Happiness at Gelisim!

Istanbul Gelisim University **students' satisfaction** has been certified by TSI.

Istanbul Gelisim University registered its quality with the ISO 10002 Customer Satisfaction Management System Certificate given by the Turkish Standards Institute. It successfully completed the inspection carried out by TSI on 18-19-20 July 2022.

TSI APPROVED STUDENTS' SATISFACTION WITH THIS CERTIFICATE

With the Student Satisfaction and Complaint Management System carried out by the Dean of Students of Istanbul Gelisim University, it is aimed to manage the requests, expectations and complaints of the students more efficiently and to increase the satisfaction level in the services and activities offered to the students. IGU, which has achieved success both with the trainings it gives to its employees and the workshops it organizes and by evaluating and resolving the complaints and suggestions from the students through two different programs, was entitled to receive the certificate approved by the Turkish Standards Institute by meeting all the standards. “The 2nd Workshop on Sustainability in Teaching Turkish as a Foreign Language in the 21st Century”

“The 2nd Workshop on Sustainability in Teaching Turkish as a Foreign Language in the Twenty-First Century” was organized by Istanbul Gelişim University, Turkish and Foreign Language Application and Research Center. After Rector Prof. Dr. Bahri Şahin, Prof. Dr. Abdurrahman Güzel made protocol speeches at the workshop. In the workshop consisting of two sessions, 8 commissions and 8 topics were discussed.

It was established to teach Turkish to foreign students coming from abroad to study in higher education institutions, to organize courses in foreign languages, and to work on necessary documentation and materials. After the first workshop held in 2022 by the Turkish and Foreign Language Application and Research Center, the “2nd Workshop on Sustainability in Teaching Turkish as a Foreign Language in the Twenty-First Century” was held on June 15, 2023. The workshop, which included 64 participants from 25 different universities from Turkey, consisted of two sessions, and was based on 8 commissions and 8 topics. In the workshop, problems encountered in teaching Turkish as a foreign language under various headings and solutions were discussed. In the workshop, the problems encountered in institutions where Turkish is taught as a foreign language and solutions were discussed. The problems encountered in the use of approaches, methods, techniques and solutions were discussed. Problems encountered in preparing and using materials and solutions were discussed. The problems encountered in teaching the basic language skills of reading, writing, listening and speaking in teaching Turkish as a foreign language and solutions were discussed. Problems encountered in grammar teaching and solution suggestions were discussed. It is aimed to make general evaluations from the workshop outputs and to report them and present them to the relevant authorities.

Earthquake Safety of Infrastructure Systems: The Example of Kahramanmaraş Earthquake

Lect. Muhammet CEYLAN
Construction Technology Program

Infrastructure systems are an integral part of developed societies. With the increasing population, the need for infrastructure systems continues to increase. With infrastructure systems, we can transport many resources such as drinking water, waste water, natural gas, oil. The use of pipelines has many advantages such as low operating costs and no safety problems. However, it is critical for the continuity of societies that these systems become resistant to natural disasters such as earthquakes, floods, landslides. In the recent past, the Northridge (1994), Kobe (1995), Kocaeli (1999), Tohoku (2011), Christchurch (2011), and finally the 7.7Mw Pazarcık and 7.6Mw Elbistan earthquakes on 6 February 2023 have caused great damage to the infrastructure systems.

Damages occurred in drinking water, waste water, natural gas pipelines, treatment plants and pumping stations in 11 provinces affected by the earthquake, including Kahramanmaraş, Gaziantep and Hatay. Due to the damage to the water intake structures and drinking water pipelines, many cities could not receive water after the earthquake. The importance of water lines for the survival of search and rescue efforts and the people affected by the earthquake has emerged once again. Both land conditions and weather conditions made it difficult to reach many damage points. According to the records of Gaziantep Water and Sewerage Administration (GASKİ), a total of 116167 drinking water and wastewater damage was intervened in the province between 6 February and 31 May 2023. According to the records of Kahramanmaraş Water and Sewerage Administration (KASKİ), 775 drinking water and 955 waste water pipeline failures were intervened between 21-28 April.

In addition to the damages in the distribution networks, a large number of damages occurred in the transmission lines.

In addition to the intensive work and successful operations of the water administrations (GASKİ, KASKİ, HATSU, etc.) of the provinces in the earthquake zone, many water administrations of Turkey (İSKİ, KOSKİ, etc.) have been active in the region and have ensured that the cities get water again. In addition to drinking water and waste water pipelines, natural gas pipelines were also damaged.

Kahramanmaraş earthquakes have shown us again that the continuity of infrastructure systems and structures has a critical importance after the earthquake. Scientific studies to be carried out in the region will be a guide for building resistant cities against future earthquakes.

CONSENT OF SPOUSE IN BAIL CONTRACT

Lect. Ahenk Çiçek SÜZEN
Justice Program

Obtaining the consent of the spouse of the surety in surety agreements is one of the new regulations introduced by the TCO No. 6098. The aim here is to ensure the sustainability of commercial relations and at the same time to protect the guarantor if the guarantor is not aware of the obligation he has undertaken. It is clear that if the guarantor does not fulfill his debt, his family will also be affected. Although the family is not related to the main debt relationship, it is aimed to protect the family unity with the arrangement regarding the consent of the spouse, since the surety may be affected by this debt and the family unity may be shaken.

In Article 169/2 of the abrogated Civil Code No. 743, it was regulated that the permission of the Magistrate was required for the dispositions to be made by one of the spouses. With the Turkish Civil Code No. 4721, the permission to be given by the judge was tied to the request of the other spouse. It is possible to say that this arrangement is much more appropriate. Based on this regulation, it was argued in the doctrine that before the regulation in the TCO, it would be possible for the surety's spouse to limit the actions of the surety with the permission of the judge for surety contracts. We can say that these discussions came to an end with the regulation in the TCO No. 6098.

Article 584 of the TCO No. 6098 seeks the consent of the spouse before the bail contract is established or at the latest at the time of the conclusion of the contract. Article 584/2 of the TCO regulates the exceptional cases in which the consent of the spouse is not sought with the provision that 'The changes made later in the surety contract that do not cause an increase in the amount for which the surety will be liable, or that the ordinary surety will turn into several guarantees or that the guarantees for the benefit of the surety will not significantly decrease'.

In addition, with Article 77 of the Law No. 6455, the cases where the consent of the spouse is not sought has been expanded. Accordingly, article 584/3 of the TCO is as follows: The consent of the spouse is not required for the guarantees to be given by the owner of the commercial enterprise registered in the trade registry or the partner or manager of the trade company in relation to the business or company, and the guarantees to be given by the tradesmen or craftsmen registered in the tradesmen and craftsmen registry in relation to their professional activities, Guarantees to be given for loans to be used within the scope of the Law on the Use of Interest Supported Credits Executed by State-owned Banks, dated 27/12/2006 and numbered 5570, and guarantees to be given in loans to be extended to cooperative members by public institutions and organizations.

A subsequent change in the marital status of the spouses will not make the invalid bail contract valid. For example, if the current spouse's consent was not obtained at the time of signing the surety agreement and the surety later divorced his spouse, this situation does not make the invalid guarantee agreement valid due to the consent of the spouse.

Pursuant to article 584 of the TCO, if the surety is married, obtaining the consent of his spouse is a condition of validity for the surety agreement. In addition, in order for the surety agreement to be valid, the written consent of the spouse of the surety must be obtained. It is sufficient that the consent of the spouse is declared and signed in ordinary written form, and the condition of qualified form or official form is not sought.

Article 584/3 of the TCO clearly regulates that the spouse's consent must be given before the conclusion of the surety agreement or at the latest during the conclusion of the contract. The consent of the spouse will not be valid after the surety has made the contract, and the spouse's subsequent approval will not make the contract valid. The aforementioned regulation regulates the status of the guarantor being married at the time of the conclusion of the contract. In this respect, the fact that the consent of the guarantor's spouse was not obtained at the time of the conclusion of the contract will not change the invalidity of the contract in case of divorce after the conclusion of the contract.

In accordance with Article 584/2 of the TCO, changes such as increasing the maximum amount that the guarantor is responsible for, converting the ordinary bail to joint bail or significantly reducing the guarantees for the guarantor's benefit will lead to an increase in the guarantor's responsibility, and in such cases, the consent of the spouse will be sought. It is necessary to understand the situations that will aggravate the responsibility of the guarantor from the expression "significant reduction of guarantees" in the article.

It is possible to establish a surety agreement between the spouses, that is, one of the spouses is the creditor and the other is the surety. In such a case, the creditor spouse may not want the spouse to be the surety for the principal debtor who owes him. However, if he has established a surety agreement with his wife and his wife has become a guarantor for the principal debtor, in this case, the invalidity of the surety agreement should not be resorted to on the grounds that the spouse's consent is not available.

It is also possible for a person to be a guarantor for his spouse's debt. There are different views in the doctrine as to whether the consent of the spouse should be sought in this situation where one of the spouses is the principal debtor and the other is the guarantor. According to one view, if a person is a guarantor for his spouse's debt, the consent of the spouse who is the main debtor is not sought. Here, a surety contract is made for the benefit of the principal debtor spouse. However, another view argues that in such a case, the consent of the spouse who is the principal debtor should be obtained. Because the spouse who is under the obligation as the main debtor may not want his spouse to be under an obligation again as a guarantor.

According to the last view, this situation should be evaluated from two perspectives. First of all, if the surety agreement and the main debt agreement are in the same text and are signed together, in such a case, it will not be incompatible with the honesty rule to invalidate the surety due to the lack of consent of the spouse who is the main debtor. However, if the surety agreement is to be concluded after the original debt agreement, the consent of the spouse, who is the main debtor, must be obtained. In our opinion, it is necessary to obtain the consent of the other spouse, as the responsibility of the other spouse as well as the main debtor spouse will create a double burden in terms of the family economy.

It is also possible for the spouses to jointly guarantor for the same debt. Considering the purpose of TCO Article 584 to protect the marriage union, in such a case, it would be appropriate to obtain the consent of the other spouse for the validity of each spouse's bail.

FOOD
TECHNOLOGIES
CLUB

Our Food Technologies Club is a specialty club established within the body of Istanbul Gelisim University, Department of Health, Culture and Sports (HCS). Food Engineer Msc. Lecturer Kübra SAĞLAM, Head of Food Technology Program at Istanbul Gelisim Vocational School, carries out the consultancy of the club. Our club was established in order to organize social activities such as seminars, conferences, technical trips in the fields of Food Technology and Food Processing, to implement the ideas of individuals with R&D ideas and to carry out patent studies, to raise awareness of consumers about clean, healthy, reliable food production and consumption. Our club is an innovative and creative club that constantly develops itself and organizes events not only for Food Technology students, but also for everyone who is interested in the sector and wants to gain knowledge in this field.

Our club's fields of activity are as follows:

- Ensuring interaction between the sector and the student
- Participating in fairs in the field of food
- Carrying out R&D activities and patent studies
- Organizing technical trips
- Celebrating Food Days and raising awareness
- Organizing in-field seminars and conferences
- Carrying out workshops
- Organizing career talks

OUR EVENTS

"ISO9001:2005 Quality Management System Basic Information Training" was held on 22/05/2023 under the coordination of Assist. Prof. Dr. KAAN KOÇALI, one of the academicians of the IGVS, Occupational Health and Safety Department. With the training, the students were informed about the ISO9001:2005 Quality Management System and the understanding of quality was instilled by providing all the basic documentation information necessary for the continuous improvement of quality. At the end of the training, a certificate of participation was issued to the students.

Moderated by Lect. Müzeyyen Büşra SAĞLAM, one of the IGVS, Culinary Program academicians, a seminar on "Education Opportunities and Working Opportunities Abroad for Cookery and Gastronomy Students" was held on Wednesday, May 17, 2023, at 15:00. Kadir AKYÜZ, the founder of Kayz International, who participated as a speaker at the seminar held with the intense interest and participation of the students, gave detailed information to the culinary and gastronomy students about the opportunities abroad and answered the questions of the students at the end of the seminar. We thank him for his participation.

A seminar on "Structural System Design Principles and Common Mistakes According to TDBY 2018" was held within the System Analysis course on 29.05.2023 by IGVS Construction Technology program. With the invitation of lecturer Yasemin KILIÇ ERDİM, Civil Engineer Dr. Rıza TORKAN attended the event as a speaker, and the things to be considered in the design of the structural system according to the earthquake regulation that came into force in 2018 were explained through the static calculation program. Common mistakes made during the designs were examined. Students' questions were answered.

The event called "Kahramanmaraş Earthquakes Field Observations" within the scope of the IGVS, Construction Technology program was carried out by Lect. Muhammet ÇEYLAN, who took part in the post-earthquake studies.

Visuals and analyzes related to the structural and ground-related damages observed in the earthquake disaster covering 11 provinces were presented, determinations and suggestions were shared. Our students' questions about the earthquake were answered.

An online interview was held with Producer & Editor Yaşar ÖZER within the IGVS, Photography and Video Club. The event started with the participant introducing himself and continued with the sharing of information about the media sector. At the end of the activity, questions from the students were included. We would like to thank our Club Counselor Lect. Hatice SARIYAR, who played an important role in the realization of our event.

The seminar on "Basic Chocolate Making Techniques", moderated by IGVS Food Technology Program Head lecturer Kübra Sağlam, was held on Tuesday, June 06, 2023 at 15:30. In the seminar attended by students, academicians and industry professionals, Dr. Faculty Member Yeliz DEMİR took part as a speaker; She explained the cocoa plant, chocolate varieties, the tricks of chocolate production, production techniques, correct storage conditions and answered the questions of the participants at the end of the seminar.

An interview was held with Dietitian Sinem ÇİNI, moderated by Lect.Aslı MUSLU CAN from the IGVS, Food Technology Program. Food Technology Program, Cookery Program and Gastronomy students attended the event. The students were informed about functional foods, diets, non-nutritive substances and nutrition suitable for the human condition, and finally, the interview was concluded with a question and answer session. Thanks to Dietician Sinem ÇİNI, who shared her valuable knowledge and experience with us.

NEWS FROM IGVS

The initiative called ZİAT Agricultural Technologies, which was started by Furkan KILIÇ and Yunus Emre DALAYMAN, 2nd year students of Istanbul Gelisim Vocational School Information Security Technology Program, in November 2022, was selected second in the "Natural Entrepreneurs Entrepreneurship and Idea Contest" organized by Doğuş University. As a result of this competition, our students won a Digital Support Package worth 80,000 USD. The initiative of our students is unique in Turkey. In the first stage, this domestic and national initiative will provide spraying, irrigation, liquid fertilization, artificial intelligence supported data analysis, mapping and training services with Agricultural Unmanned Aerial Vehicles. Our students' initiative called ZİAT Agricultural Technologies aims to take investment and enter the market in the second quarter of 2023.

In the HackMe CTF competition organized by the Capsule Technology Platform and LastGuard Cyber Security Technologies, the "Ah Yalan Dünya" Team, which included Mehmet Demir from the IGVS Information Security Technologies Program, won the first prize of 10,000 TL in the Web Security category.

Head of Istanbul Gelisim Vocational School Food Technology Program, food engineer lecturer Kübra SAĞLAM, gave a seminar on "Functional Foods and Healthy Nutrition" to high school students of the Food Technology Program with the invitation of Private Şafak Schools on Tuesday, 28.03.2023 at 13:00. During the seminar, she answered high school students' questions about the seminar topic and the university. At the end of the seminar, a plaque was presented to her, and a souvenir photo was taken after the school administration and vocational teachers thanked her.

IGVS, Web Design and Coding Program, Program Director Lect.Çisem YAŞAR was invited as a studio guest to the program "Sertan KIRÇO ile Vizyon" on Business Channel Turkish TV. Lect. Çisem Yaşar, who was the studio guest of the "Sertan Kırço ile Vizyon programı" on Business Channel Turkish TV, gave information about the project-oriented working and cooperative learning approach and answered the questions about these issues.

Istanbul Gelisim Vocational School Occupational Health and Safety Program Dr. Faculty Member Kaan KOÇALI received the "Institution of Occupational Safety and Health (IOSH) Managing Safety" and "National Examination Board in Occupational Safety and Health (NEBOSH) IG1 & IG2" certificates. Thus, he became the first academician to have an international occupational safety expert qualification in the field of occupational health and safety in Europe.
