PARTNERSHIPS FOR THE GOALS (SDG17) REPORT

About the Report

This report details the activities carried out by Istanbul Gelisim University (IGU) in 2023 and their relationship with the United Nations Sustainable Development Goals (SDGs).

The report aims to raise the awareness of students and staff towards sustainable development goals and to document the contributions of IGU in this field. In this context, IGU's commitment and contributions to SDG's are summarized in the report.

PARTNERSHIPS FOR THE GOALS

IGU for Ecological, Social and Economic Sustainability

Acknowledgment

We would like to thank IGU's valuable academicians, administrative managers, employees, dear students, graduates, internal and external stakeholders who contributed to the creation of the report.

We would also like to thank all members of the university, university stakeholders who have embraced all the existing goals related to Sustainability in the content of the report and have worked in this direction, and the university Board of Trustees and the Rectorate for providing endless support for these studies.

2. Sustainability Themed Courses

The sustainability-themed courses offered at IGU aim to raise students' awareness of environmental issues and help them develop solutions to these problems. These courses provide students with the knowledge and skills in line with SDGs and lay the foundation for them to become the leaders of the future. Curricula covering topics such as ecosystem management and renewable energy provide students with both theoretical knowledge and practical application opportunities. In this way, they grow up as individuals who are environmentally conscious and work for a sustainable future.

2.1. Common Sustainability Courses Offered Across the University

In the table below, the courses offered at IGU and added to the curriculum by the departments are indicated.

Course Title: [EKF218 - Introduction to Sustainability](#)

Department Type: Undergraduate

Course Content: The course covers the historical and theoretical framework of the concept of sustainability starting from environmental externalities and market failures; the comparative evaluation of sustainability policies implemented in the world and in Turkey within the conceptual and theoretical background; the interpretation of the quantitative indicators of industrial ecology and green economy; and the analysis of the relationship of sustainability with justice and welfare.

3. Policies

IGU aims to promote environmental, social and economic sustainability by putting the principle of sustainability at the center of all its activities. It encourages its students and staff to take action for a sustainable future through social responsibility projects and activities. By developing academic programs and research activities in line with SDGs, IGU continuously updates and improves these policies and aims to create positive impacts at local and global levels.

Governance Policy With Internal and External Stakeholders

To ensure the participation of stakeholders in the quality assurance system in order to ensure the continuous improvement and development of all academic and administrative activities carried out at IGU. In this context, the principle of governance is primarily aimed at ensuring that all stakeholders are actively involved in decision-making processes and that processes are transparent, sustainable and open to contribution. The University acts in an effort to share the basic rules and principles on which it is based with all the stakeholders with whom it is related and to develop them with their contributions. *[Click for detailed information.](#)*

Policy of Sustainability Research

As an actor of the world of science, İstanbul Gelisim University has built its national and international researches on policy and strategies of sustainability. The University focuses on the concept of sustainability, especially in the social, economic and environmental context, and takes care to design and conduct its research in this context and encourages its researchers in this direction. [Click for detailed information.](#)

Sustainability Training Policy

IGU is a higher education institution that advocates that sustainable development can be realized by learning how to meet the needs of today's generation without compromising the ability to meet the needs of future generations. The University is a higher education institution that believes that the natural, social and economic problems that arise as a result of the unsustainable activities of humanity can only be transformed through educational programs that contribute to the sustainability awareness of the societies. [Click for detailed information.](#)

Internationalization Policy

Higher education institutions entered a period in which they carried out their activities in an environment where the rate of change is high and the half-life of the information is quite short in a world, where ecological, social, economic and technological effects of the transboundary features comes foreground; that has been integrated more than ever in the past with the effect of globalization and communication technologies. 4. Collaborations in line with Sustainable Development Goals

IGU cooperates with various NGOs and official institutions to achieve its sustainability goals. Through these collaborations, joint work is carried out on environmental and social projects and best practices are shared. IGU aims to provide its students and staff with a broad perspective on sustainability by developing joint projects with university-industry collaborations and non-governmental organizations. These collaborations strengthen IGU's efforts towards SDGs and increase its contribution to society.

5. IGU SDG Reports for Previous Years

IGU publishes SDG reports every year to transparently share its commitments and progress on sustainability. These reports detail the progress made and projects realized by our university towards its environmental, social and economic sustainability goals. SDG reports from previous years reveal IGU's achievements and continuous improvement efforts in its sustainability journey. These reports are important documents that demonstrate to our students, staff and stakeholders our university's commitment and contributions to sustainability.
